Section 3 Explanations

Underground Storage Tank: There is a 500 gal propane tank buried in back yard.

Water Penetration: Approx 2011, water was blown/splashed past the door seals in sitting room. This was caused by defective door seals and by water coming off the roof and splashing on the concrete pad just outside the door. Solution was to install gutters and install door with better seals. There has been no water penetration at the door since the repairs.

Treatment for Termites: Termites were found during the new door installation described above. Terminix treated/eliminated the termites. No repairs were required. A Terminix guarantee is in place through 11/30/016 that ensures no cost to homeowner for future termite treatment or repairs. There have been no termites found during annual inspections by Terminix since that time.

Water Penetration: Approx 2012, water drops/mist was blown outside the drainage pan onto the attic floor near the A/C evaporator unit in the attic (master bath side of house). It was caused by normal preventative maintenance performed incorrectly: bleach and water mixture was poured down the condensation drain to keep mold from forming in the drainage pipe, but the drain pipe cap was replaced on the wrong pipe. As a result, there was a pressure imbalance in the drainage system which affected how the condensate was collected and drained. The A/C fan blew condensate past the drainage pan, and a small amount water accumulated in the attic above the upstairs bedroom. The water seeped through the sheetrock at the tape seam and dripped on the bed and carpet below. The water 'footprint' that reached the carpet was palm-size. The water was picked up with towels, and the wet sheetrock tape was removed. A de-humidifier was used to extract the remaining moisture from the sheetrock, bed, and carpet. The sheetrock is mold-resistant type, and it also retained its structural integrity. The sheetrock joint was re-taped and texture was applied. The bedroom ceiling was re-painted. The slow water leak was discovered within a few days of the [incorrect] preventative maintenance.
