

626.5 Ac., m/I,
In 3 Parcels
Lafayette
County, MO

Date: Tues. Nov. 17, 2015

Time: 1:00 p.m.

Auction Site:

VFW Hall

Address:

Corner of Hwy. 20 and State Hwy. BB
Corder, MO 64021

Auction Information

Method of Sale

- Parcels will be offered individually, and will not be combined.
- Properties are selling "As Is, Where Is"
- Bids will be \$/acre x Net Taxable Acres
- Seller reserves the right to refuse any and all bids.

Seller

The Patricia Cox Trust and the Morris B. Cox Trust

Agency

Hertz Farm Management, Inc. and their representatives are Agents of the Seller.

Terms of Possession

- 10% down payment required the day of sale.
- Successful bidders are purchasing with no financing contingencies and must be prepared for cash settlement of their purchase on or before December 18, 2015 or after any objections to title have been cleared.
- Final settlement will require certified check or wire transfer.
- Possession will be given at settlement subject to the existing lease which expires March 1, 2016.
- Taxes will be prorated to December 18, 2015
- Seller/Tenant reserve the use of the grain bins on Parcels 1 and 2 until July 1, 2016.

- All cattle panels, gates, waterers and other cattle equipment on Parcels 2 and 3 belong to the tenant and are not included in sale.

Announcements

Information provided herein was obtained from sources deemed reliable, but the Auctioneer makes no guarantees as to its accuracy. Prospective bidders are urged to fully inspect the property and to rely on their own conclusions. Announcements made the day of the auction will take precedence over previously printed material and/or oral statements. Bidding increments are at the discretion of the Auctioneer. Acreage figures are based on information currently available, but are not guaranteed.

National Commodity Crop Productivity Index (NCCPI) model is a "national soil interpretation that is not intended to replace other crop production models developed by individual states. At present, NCCPI is generated in the National Soil Information System (NASIS) environment and is reported in the Soil Data Mart and on Web Soil Survey. It presently deals only with non-irrigated crops, but at a later date it will be expanded to include irrigated crops, rangeland, and forestland productivity. The NCCPI uses natural relationships of soil, landscape and climate factors to model the response of commodity crops in soil map units according to The value of ranges is from 0 to 100, 100 being the best." ("User Guide for the National Commodity Crop Productivity Index (NCCPI) Version 2.0" iii)
