Information About Brokerage Services

Before working with a real estate broker, you should know that the duties of a broker depend on whom the broker represents. If you are a prospective seller or landlord (owner) or a prospective buyer or tenant (buyer), you should know that the broker who lists the property for sale or lease is the owner's agent. A broker who acts as a subagent represents the owner in cooperation with the listing broker. A broker who acts as a buyer's agent represents the buyer. A broker may act as an intermediary between the parties if the parties consent in writing. A broker can assist you in locating a property, preparing a contract or lease, or obtaining financing without representing you. A broker is obligated by law to treat you honestly.

IF THE BROKER REPRESENTS THE OWNER:

The broker becomes the owner's agent by entering into an agreement with the owner, usually through a written - listing agreement, or by agreeing to act as a subagent by accepting an offer of subagency from the listing broker. A subagent may work in a different real estate office. A listing broker or subagent can assist the buyer but does not represent the buyer and must place the interests of the owner first. The buyer should not tell the owner's agent anything the buyer would not want the owner to know because an owner's agent must disclose to the owner any material information known to the agent.

IF THE BROKER REPRESENTS THE BUYER:

The broker becomes the buyer's agent by entering into an agreement to represent the buyer, usually through a written buyer representation agreement. A buyer's agent can assist the owner but does not represent the owner and must place the interests of the buyer first. The owner should not tell a buyer's agent anything the owner would not want the buyer to know because a buyer's agent must disclose to the buyer any material information known to the agent.

IF THE BROKER ACTS AS AN INTERMEDIARY:

A broker may act as an intermediary between the parties if the broker complies with The Texas Real Estate License Act. The broker must obtain the written consent of each party to the transaction to act as an

intermediary. The written consent must state who will pay the broker and, in conspicuous bold or underlined print, set forth the broker's obligations as an intermediary. The broker is required to treat each party honestly and fairly and to comply with The Texas Real Estate License Act. A broker who acts as an intermediary in a transaction:

- (1) shall treat all parties honestly;
- (2) may not disclose that the owner will accept a price less than the asking price unless authorized in writing to do so by the owner;
- (3) may not disclose that the buyer will pay a price greater than the price submitted in a written offer unless authorized in writing to do so by the buyer; and
- (4) may not disclose any confidential information or any information that a party specifically instructs the broker in writing not to disclose unless authorized in writing to disclose the information or required to do so by The Texas Real Estate License Act or a court order or if the information materially relates to the condition of the property.

With the parties' consent, a broker acting as an intermediary between the parties may appoint a person who is licensed under The Texas Real Estate License Act and associated with the broker to communicate with and carry out instructions of one party and another person who is licensed under that Act and associated with the broker to communicate with and carry out instructions of the other party.

If you choose to have a broker represent you, you should enter into a written agreement with the broker that clearly establishes the broker's obligations and your obligations. The agreement should state how and by whom the broker will be paid. You have the right to choose the type of representation, if any, you wish to receive. Your payment of a fee to a broker does not necessarily establish that the broker represents you. If you have any questions regarding the duties and responsibilities of the broker, you should resolve those questions before proceeding.

Real estate licensee asks that you acknowledge receipt of this information about brokerage services for the licensee's records.

Un- Regulated Well Field Development in Hays County

Fellow Citizens,

It has been brought to my attention that there is a large un-regulated well field being developed in mid-western Hays County near FM 3237. The company developing this project is a Houston-based company called Electro Purification LLC. They propose to deliver to potential customers around 6,000 acre feet of water per year out of this area of the Trinity Aquifer. As the representative of Precinct 3, this gives me a great deal of concern. Firstly, I am worried about the potential impact on residential and commercial wells in the nearby area. Secondly, I am wary of the overall health of the Trinity Aquifer in Hays County. Some actions have been taken out of the Precinct 3 office that I would like to bring to your attention.

Commissioner Whisenant, Representative Isaac, and I met with the principals of Electro Purification around January, 8th 2015. We each expressed our concerns over this amount of water being distributed out of this area. Electro Purification and their representatives ensured us that the proper studies have been done and that they felt confident their project wouldn't negatively impact the surrounding area or the Trinity Aquifer. I asked them to consider five points.

1. An exit strategy to the project;
2. A binding agreement that protected area well owners, should the project negatively impact their water supplies;
3. Sharing their costs in the project at this point in time;
4. sharing the data associated with the project;
5. Providing copies of any contracts or letters of intent they may have with potential customers

Electro Purification stated that they would provide the information requested in items 4 and 5. However, they asked for more time to consider their level of comfort on requests 1, 2 and 3. At this time, I have received no information. I have asked in two different emails that they at least provide the well data to my office. I am hopeful that they will respond to these requests, as it would provide us with an opportunity to have a real conversation about the impact of their proposed operations.

I, along with many of my colleagues, have discussed this issue with the groundwater districts in Hays County. We have asked that they get together and see if they can develop some reasonable legislation that might cover this gap in groundwater regulatory authority in our community. To my knowledge the groundwater districts are working together and will try to deliver something to Representative Isaac in the near future. This is a complicated issue that will warrant a tremendous amount of discussion. However I am optimistic that our groundwater districts, working with Representative Isaac can come up with a good solution. The rule of capture should not be the only rule that applies to a corporate entity with the intentions of commercial distribution of water resources. I believe there must be some accountability on this whole process beyond free market principles that will protect the private property rights of land owners in an impacted area.

As of yesterday, the Precinct 3 office has filed Public Information Act requests with the following political subdivisions: the City of Kyle, Mountain City, the City of Buda, and Goforth Special Utility District. We filed these requests to ensure we have all information available in order to make the best decisions moving forward in our representation of the citizens of Hays County. We need to understand the entirety of the issue. If any information has been shared or discussed with these political subdivisions, access to that information will allow us to better assess the situation. I do not want to imply that these political subdivisions aren't cooperating with informal request. I believe that implementing formal requests was simply the best way to move forward in a timely manner. Hopefully, the Precinct 3 office will receive information from these entities in the near future that helps us better understand the issues at hand.

Commissioner Whisenant and I have placed an agenda item on the Commissioners Court agenda for next Tuesday, January 20th. In this Court session I plan to share with the Court the information we may have about this project. We will also discuss next steps. I assume this will be one of many meetings that we will have on this issue.

In closing, this is a very difficult and complicated issue. This proposed project may also have a direct impact on many people throughout Hays County. It is important in this time of tremendous change in Hays County that we do things wisely and carefully. We must also maintain our core principles and beliefs. As difficult as that can be, it is the challenge that is

before us today. I am confident with hard work, good government, and principled positions we will meet these challenges and leave Hays County and its people a better and brighter future.

Sincerely,

Will Conley

Hays County Commissioner, Precinct 3

JASON ISAAC

STATE REPRESENTATIVE
House District 45

For Immediate Release: May 24, 2015
Contact: Chelsey McGee - (512) 463-0647

BREAKING: Rep. Isaac and Sen. Campbell Pass Hays County Water Protection Bill

AUSTIN, TX - State Representative Jason Isaac (R-Dripping Springs) and State Senator Donna Campbell (R-New Braunfels) passed HB 3405 this evening in the Senate. HB 3405 will expand the boundaries of the Barton Springs-Edwards Aquifer Conservation District (BSEACD) to cover a portion of the Trinity Aquifer in Hays County that is not currently within a groundwater district.

Since the passage of HB 3405 in the House on May 8, 2015, Rep. Isaac and Sen. Campbell have diligently worked to fight off amendments and unnecessary language in the Senate.

"Today is a great day for Hays County. I'm pleased to announce an agreement has been reached that will protect private property rights and groundwater within Hays County," said Rep. Isaac.

"Additionally, BSEACD is a non-taxing district, and residential and agricultural wells will be exempt from fees."

With the passage of HB 3405 we have protected the private property rights of those that may wish to sell their water, while protecting the private property rights of those surrounding well owners that may be negatively affected.

Sen. Campbell stated, "I am confident that we have taken a key step to protecting the Trinity Aquifer and current well owners who have been fearful of their wells running dry."

TEXAS ASSOCIATION OF REALTORS®

INFORMATION ABOUT ON-SITE SEWER FACILITY

USE OF THIS FORM BY PERSONS WHO ARE NOT MEMBERS OF THE TEXAS ASSOCIATION OF REALTORS® IS NOT AUTHORIZED.
©Texas Association of REALTORS®, Inc., 2004

CONCERNING THE PROPERTY AT

121 JASMINE CT
DRIFTWOOD, TX 78619

A. DESCRIPTION OF ON-SITE SEWER FACILITY ON PROPERTY:

- (1) Type of Treatment System: ☐ Septic Tank ☒ Aerobic Treatment ☐ Unknown
- (2) Type of Distribution System: Sprinklers ☐ Unknown
- (3) Approximate Location of Drain Field or Distribution System: Side yard ☐ Unknown
Driveway
- (4) Installer: Smith Septic ☐ Unknown
- (5) Approximate Age: 10 years ☐ Unknown

B. MAINTENANCE INFORMATION:

- (1) Is Seller aware of any maintenance contract in effect for the on-site sewer facility? ☒ Yes ☐ No
If yes, name of maintenance contractor: AAMS
Phone: 512-847-0757 contract expiration date: 6/15/2015
Maintenance contracts must be in effect to operate aerobic treatment and certain non-standard on-site sewer facilities.)
- (2) Approximate date any tanks were last pumped? 2013
- (3) Is Seller aware of any defect or malfunction in the on-site sewer facility? ☐ Yes ☒ No
If yes, explain: _____
- (4) Does Seller have manufacturer or warranty information available for review? ☐ Yes ☒ No

C. PLANNING MATERIALS, PERMITS, AND CONTRACTS:

- (1) The following items concerning the on-site sewer facility are attached:
☐ planning materials ☐ permit for original installation ☐ final inspection when OSSF was installed
☐ maintenance contract ☐ manufacturer information ☐ warranty information ☐ _____
- (2) "Planning materials" are the supporting materials that describe the on-site sewer facility that are submitted to the permitting authority in order to obtain a permit to install the on-site sewer facility.
- (3) It may be necessary for a buyer to have the permit to operate an on-site sewer facility transferred to the buyer.

D. INFORMATION FROM GOVERNMENTAL AGENCIES: Pamphlets describing on-site sewer facilities are available from the Texas Agricultural Extension Service. Information in the following table was obtained from Texas Commission on Environmental Quality (TCEQ) on 10/24/2002. The table estimates daily wastewater usage rates. Actual water usage data or other methods for calculating may be used if accurate and acceptable to TCEQ.

<u>Facility</u>	<u>Usage (gal/day) without water- saving devices</u>	<u>Usage (gal/day) with water- saving devices</u>
Single family dwelling (1-2 bedrooms; less than 1,500 sf)	225	180
Single family dwelling (3 bedrooms; less than 2,500 sf)	300	240
Single family dwelling (4 bedrooms; less than 3,500 sf)	375	300
Single family dwelling (5 bedrooms; less than 4,500 sf)	450	360
Single family dwelling (6 bedrooms; less than 5,500 sf)	525	420
Mobile home, condo, or townhouse (1-2 bedroom)	225	180
Mobile home, condo, or townhouse (each add'l bedroom)	75	60

This document is not a substitute for any inspections or warranties. This document was completed to the best of Seller's knowledge and belief on the date signed. Seller and real estate agents are not experts about on-site sewer facilities. Buyer is encouraged to have the on-site sewer facility inspected by an inspector of Buyer's choice.

Hays County Environmental Health NOTICE OF APPROVAL FOR ON-SITE SEWAGE FACILITY

THIS IS TO CERTIFY that the on site sewage facility located at:

OSSF #: **2004 - 2839**

121 JASMINE COURT, DRIFTWOOD TX 78619

Grid:

SIERRA WEST IVB

Block: Lot: **21 & 20** ☒ Routine Maintenance

meets or exceeds the basic requirements established by the County.

LICENSE TO OPERATE this facility is hereby granted to the owner. This license simply grants permission to operate this facility; it does not guarantee its successful operation. Routine maintenance and proper functioning are the sole responsibility of the owner.

KEEP THIS LICENSE with important papers. You may need it when selling your house or if a malfunction occurs

Tank Type: Concrete Box

Valve: Sample

Max Flow: 300 gallons/day

Tank Size: 0 gallons

Drainfield Size: 4687 sq. ft.

Installed By: SMITH, DAVID

Engineered By: FOGLE, DORA R

The above referenced private sewage facility has been inspected by the Hays County Health Department for compliance with the Rules of Hays County and, based on information provided in the application, has been found to comply with the requirements of those Rules.

NOTE: This certification does not extend to the materials, workmanship or fabrication of the private sewage facility so as to express or imply to the owner or installer of the facility any warranty by or rights against Hays County or any of its agencies, as to the quality or durability of the facility nor compliance with the owner's individual specifications and requirements, but solely relates to the facility meeting the requirements of Hays County in effect as of this date.

NOTE: This approval simply grants permission to operate this facility; it does not guarantee its successful operation. Routine maintenance and proper functioning are the sole responsibility of the owner.

NOTE: This approval remains in effect until such time as there is evidence that this facility is not operating properly and may constitute a threat to the health of the people of Hays County.

The specified backfill should not be altered or covered in any way except for sodded grass or grass seeded cover to promote evaporation. All plumbing in the house should be kept in good repair to minimize flooding of the drainfield.

COPY

Date of Final Inspection: 6/3/2005

Issued this date: 6-3-05

Allen D. Watson

Director, Environmental Health

[Signature]
Sanitarian

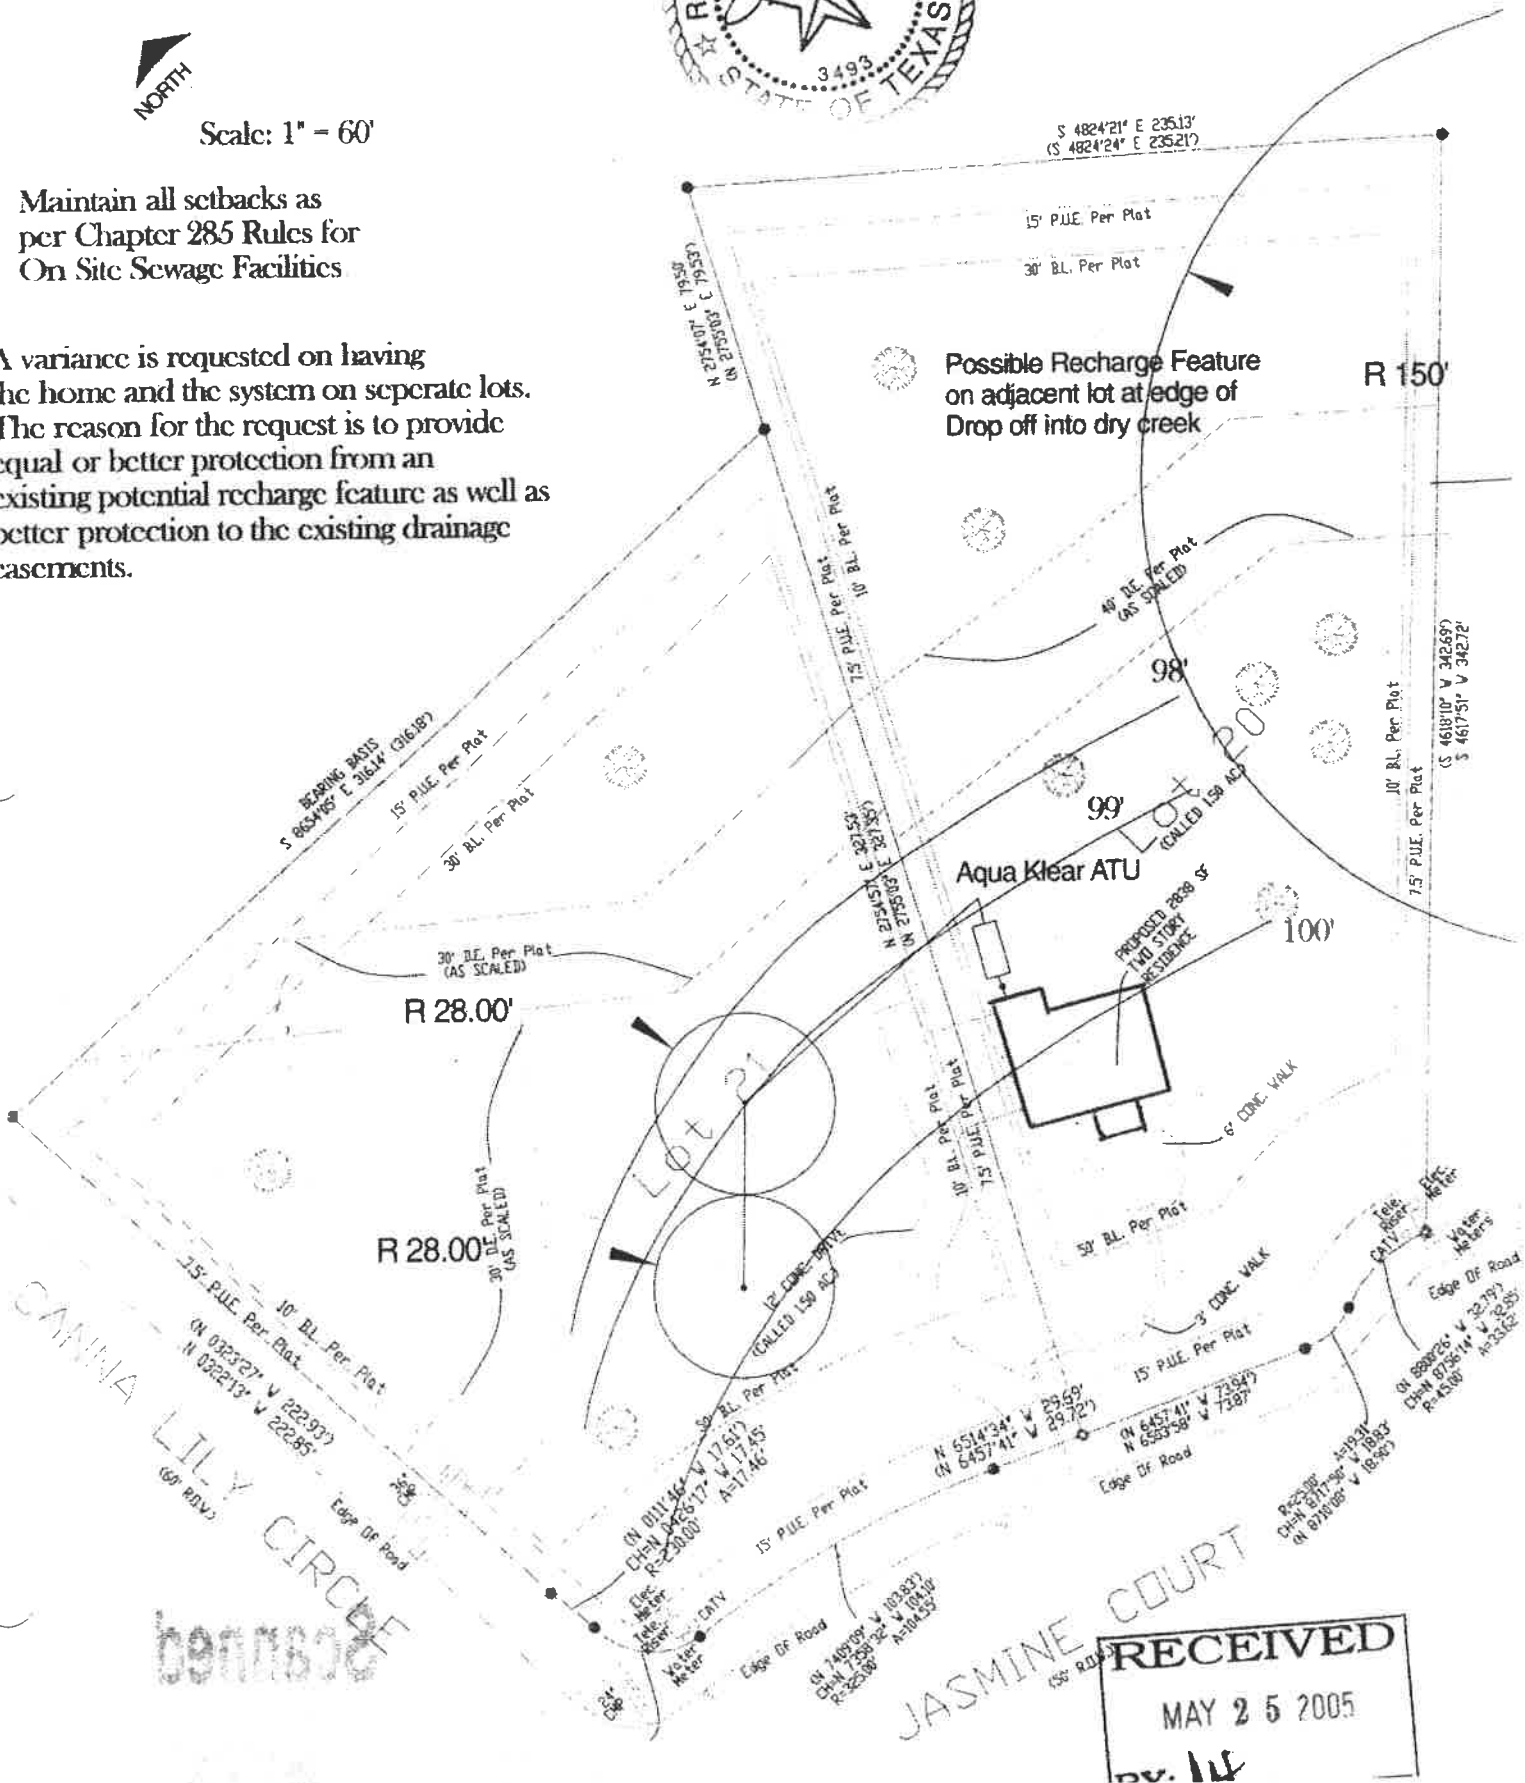

A circular seal for the State of Texas. The outer ring contains the text "REGISTERED SANITARIAN" at the top and "STATE OF TEXAS" at the bottom, separated by two stars. Inside the ring, the name "DON R. FOGLE" is written in a curved path. In the center is a five-pointed star with the number "3493" below it. A signature is scrawled across the star and the name.

Maintain all setbacks as per Chapter 285 Rules for On Site Sewage Facilities

A variance is requested on having the home and the system on seperate lots. The reason for the request is to provide equal or better protection from an existing potential recharge feature as well as better protection to the existing drainage easements.

TEXAS ASSOCIATION OF REALTORS®
GENERAL INFORMATION AND NOTICE TO A BUYER

USE OF THIS FORM BY PERSONS WHO ARE NOT MEMBERS OF THE TEXAS ASSOCIATION OF REALTORS® IS NOT AUTHORIZED.
©Texas Association of REALTORS®, Inc. 2012

Be an informed buyer. Make sure that the property you want to purchase meets your needs. The following information may assist you during your purchase.

ANNEXATION. If the property you buy is outside the limits of a municipality, you should be aware that the property may later be annexed by a nearby municipality. You may find information on the boundaries of nearby municipalities by contacting the municipalities directly.

APPRAISAL. An appraisal is a valuation of the property. An appraiser renders an estimate of value as of a certain date under assumptions and conditions stated in the appraisal report. Typically, a buyer's lender requires an appraisal to verify that the loan is secured by property that is worth a certain amount. An appraisal is not the same as an inspection.

BROKERS. A real estate broker *represents* a party (buyer or seller) in a real estate transaction or may act as an intermediary between the parties. You may work with the broker or with one of the broker's agents. You will be provided a form titled "Information About Brokerage Services" (TAR 2501) which defines agency relationships. The agent may help you locate a property and is obligated to *negotiate* the transaction. The agent may assist you in gathering information and may coordinate many details in the transaction. Brokers and agents are not inspectors. They do not possess the expertise to conduct inspections and therefore do not make any representations, warranties, or guarantees about a property's condition. Agents are not attorneys. You are encouraged to seek the assistance of an attorney to help you understand any of the legal consequences and provisions of your contract or transaction.

ENVIRONMENTAL CONCERNS.

General. Over the years the market has identified environmental conditions that buyers should know may exist. Environmental hazards include, but are not limited to, conditions such as: asbestos, lead-based paint, mold, pesticides, radon gas, toxic waste, underground storage tanks, urea formaldehyde insulation, and other pollutants. Wetlands or endangered species on the property may restrict the use of the property.

Environmental Inspections. If you are concerned that environmental hazards, wetlands, or endangered species may be present on the property you wish to buy, you should hire a qualified expert to inspect the property for such items. You may include a promulgated addendum (TAR 1917) in your contract that may address such matters.

Lead-Based Paint. If you buy a property that was built before 1978, federal law requires that you be provided with: (1) the pamphlet titled "Protect Your Family from Lead in Your Home" (TAR 2511); (2) the records and reports the seller has concerning lead-based paint or hazards; and (3) an opportunity to have the property inspected for lead-based paint or hazards.

Mold. It is not uncommon to find mold spores in a property. The concern about mold increases when there are large amounts of mold found in a property. The Texas Department of Insurance publishes a document titled "Protect Your Home from Mold" (TAR 2507) which discusses mold in more detail.

Oak Wilt and Diseased Trees. There are diseases such as oak wilt and other conditions that may affect trees and other plants. Oak wilt is a fungus that affects certain oak trees. If you are concerned about such matters, have the trees and other plants inspected by a professional of your choice.

Noise. Properties around the property you may buy are used for a variety of purposes. Some of the uses cause noise (for example, airports, railways, highways, restaurants, bars, schools, arenas and construction). You are encouraged to drive and review the area around any property in which you are interested at various times and days.

EXPANSIVE SOILS. Soil conditions vary greatly throughout Texas. Many soils will move; some more than others. This movement will, many times, affect the foundation of homes and buildings and may cause cracks to appear in walls or other parts of the building. Additionally, if you buy a property that is newly constructed, the concrete curing process may also cause the foundation of the building to move. Seasonal changes in the moisture in the soil may also cause foundations to move. Check with your inspector and other experts on preventive methods that you can follow to minimize the risk of such movement.

FLOOD HAZARD, FLOODWAYS, AND FLOOD INSURANCE. Many properties are in flood hazard areas. Lenders who make loans on properties located in special flood hazard areas typically require the owner to maintain flood insurance. Additionally, some properties may lie in the floodway. The Texas Association of REALTORS® publishes a form titled, "Information about Special Flood Hazard Areas" (TAR 1414), which discusses flood hazard areas and floodways in more detail. You are encouraged to buy flood insurance regardless of whether the property is in a high, moderate, or low risk flood area.

HISTORIC OR CONSERVATION DISTRICTS. Properties located in historic or conservation districts may have restrictions on use and architecture of the properties. Local governments may create historic or conservation districts for the preservation of certain architectural appeal. A property owner may or may not be aware if the property is located in such a district. If you are concerned whether the property you wish to buy is located in such a district, contact the local government for specific information.

INSPECTION, REPAIRS, & WALK-THROUGH.

Inspections. You are encouraged to have the property you want to buy inspected by licensed inspectors of your choice. You should have the inspections completed during any option period. You should accompany the inspectors during the inspections and ask the inspectors any questions. Brokers and agents do not possess any special skills, knowledge or expertise concerning inspections or repairs. If you request names of inspectors or repair professionals from your agent, you should note that the agent is not making any representation or warranty as to the ability or workmanship of the inspector or repair professionals.

Repairs. You and the seller should resolve, in writing, any obligation and any timing of the obligation to complete repairs you may request before the option period expires.

Walk-Through. Before you close the sale, you should walk through the property and verify that any repairs are complete. If the condition of the property does not satisfy the contractual provisions, notify your agent before you close.

MANDATORY OWNERS' ASSOCIATIONS. The property you buy may require you to be a member in one or more owners' associations. You may obtain subdivision information (the restrictions applying to the subdivision, the bylaws and rules of the owners' association, and a resale certificate). You may be required to pay for the subdivision information unless you negotiate otherwise in the contract. If membership in an owners' association is required, you will probably be obligated to pay periodic dues or assessments. Failure to pay such dues could result in a lien on and foreclosure of the property.

MINERAL INTERESTS. Determining who owns the mineral interests under a property (for example, rights to oil and gas interests) normally requires an expert to review the chain of title to the property. Many times the mineral interests may have been severed from the property and may be owned by persons other than the seller. Contract forms commonly used in Texas provide that the seller's interest, if any, in the mineral interests convey to the buyer as part of the property. However, a seller may wish to retain all or a part of the mineral interests. The Texas Association of REALTORS® publishes a form titled "Information about Mineral Clauses in Contract Forms": (TAR No. 2509) which discusses this issue in more detail.

MULTIPLE LISTING SERVICE. The Multiple Listing Service (MLS) is a database and cooperative tool between brokers. Agents who use the MLS must comply with the MLS's rules. The listing agent is required to timely report the current status of a listing, including when the property is sold or leased or is no longer available, as well as the sales price. Subscribers (other brokers, agents, appraisers, other real estate professionals, and the appraisal districts) have access to the information for market evaluation purposes. Much of the information in the MLS, such as square footage, assessed value, taxes, school boundaries, and year built is obtained from different sources such as the county appraisal district, an appraiser, or builder. The broker or agent who provides you with information from the MLS does not verify the accuracy of the information. You should independently verify the information in the MLS and not rely on the information.

POSSESSION. Most contracts provide that the seller will deliver possession of the property to the buyer at the time the sale *closes and funds or according to a temporary residential lease*. There may be a short delay between closing and actual funding; especially if the buyer is obtaining funds from a lender. You may need to verify with the lender if the loan will fund on the day of closing. You should also take this potential delay into account when planning your move into the property. Any possession by the buyer before the sale closes and funds (or by the seller after the sale closes and funds) must be authorized by a written lease.

PROPERTY INSURANCE. Promptly after entering into a contract to buy a property and before any option period expires, contact your insurance agent to determine the availability and affordability of insurance for the property. There are numerous variables that an insurance company will evaluate when offering insurance at certain coverage levels and at certain prices. Most lenders require that the property be insured in an amount not less than the loan amount. The failure to obtain property insurance before closing may delay the transaction or cause it to end. The Texas Association of REALTORS® publishes a document titled, "Information about Property Insurance for a Buyer or Seller" (TAR 2508), which discusses property insurance in more detail.

RESIDENTIAL SERVICE CONTRACTS. A residential service contract is a product under which a residential service company, for an annual fee, agrees to repair or replace certain equipment or items in a property (for example, covered appliances, air conditioning and heating systems, and plumbing systems). Co-payments typically apply to most service calls. If you request names of residential service companies from your agent, you should note that the agent is not making any representation or warranty about the service company.

SCHOOL BOUNDARIES. School boundaries may change and are, at times, difficult to determine. The school boundaries that your agent may provide to you or that may be provided through a Multiple Listing Service are only mapped estimates from other sources. You are encouraged to verify with the school district which schools residents in the property will attend.

SEPTIC TANKS AND ON-SITE SEWER FACILITIES. Many properties have septic tanks or other on-site sewer facilities. There are several types of such systems. Special maintenance requirements may apply to certain systems. Please refer to a document titled, "Information about On-Site Sewer Facility" (TAR 1407) for more information. You should also determine if the county requires any registration or other action in order for you to begin using the septic system or on-site sewer facility.

SEX OFFENDERS AND CRIMINAL ACTIVITY. If you are concerned about sex offenders who may reside in the area in which you are buying, access www.txdps.state.tx.us. Contact the local police department to obtain information about any criminal activity in the area.

SQUARE FOOTAGE. If you base your purchase price on the size of the property's building and structures, you should have any information you receive about the square footage independently verified. Square footage information comes from other sources such as appraisal districts, appraisers, and builders. Such information is only an estimate. The actual square footage may vary.

STATUTORY TAX DISTRICTS. The property you buy may be located in a utility or other statutorily created district providing water, sewer, drainage, or flood control facilities and services (for example a Municipal Utility District, Water Improvement District, or a Public Improvement District). You are likely to receive a prescribed notice when buying property in such a district.

SURVEY. A survey identifies the location of boundaries, major improvements, fence lines, drives, encroachments, easements, and other items on the property. You should obtain a survey early enough in the transaction to help you identify any encroachments, encumbrances to title, or restrictions. Your contract will typically contain a provision under which you may obtain or be provided with a survey and the right to object to encumbrances to title disclosed in the survey.

SYNTHETIC STUCCO. Synthetic stucco (sometimes known as EIFS) is an exterior siding product that was placed on some properties in the recent past. If the product was not properly installed, it has been known to cause damage to the structure (such as wood rot and moisture). If the property you wish to buy has synthetic stucco, ask your inspector to carefully inspect the siding and ask your inspector any questions you may have.

TAX PRORATIONS. Typically, a buyer and seller agree to prorate a property's taxes through the closing date. Property taxes are due and payable at the end of each calendar year. The escrow agent will estimate, at closing, the taxes for the current year. If the seller is qualified for tax exemptions (for example, homestead, agricultural, or over-65 exemption), such exemptions may or may not apply after closing. After closing the taxes may increase because the exemptions may no longer apply. When buying new construction, the taxes at closing may be prorated based on the land value only and will later increase when the appraisal district includes the value of the new improvements. The actual taxes due, therefore, at the end of the year and in subsequent years may be different from the estimates used at closing.

TERMINATION OPTION. Most contract forms contain an option clause which provides the buyer with an unrestricted right to terminate the contract. Most buyers choose to buy the termination option. You will be required to pay for the termination option in advance. The option fee is negotiable. Most buyers will conduct many of their reviews, inspections, and other due diligence during the option period. You must strictly comply with the time period under the option. The option period is not suspended or extended if you and the seller negotiate repairs or an amendment. If you want to extend the option period you must negotiate an extension separately, obtain the extension in writing, and pay an additional fee for the extension. Do not rely on any oral extensions.

TIDE WATERS. If the property you buy adjoins any of the state's tidal waters, you will be given a prescribed notice titled, "Addendum for Coastal Area Notice" (TAR 1915) at the time you sign a contract. Boundaries of properties along such waters may change and building restrictions will apply. If the property is located seaward of the Gulf Intracoastal Canal, you will receive a separate notice (TAR 1916).

TITLE INSURANCE OR ABSTRACT OF TITLE. You should obtain a title insurance policy or have an abstract of title covering the property examined by your attorney. If you obtain a title insurance policy, you should have the commitment of title insurance reviewed by your attorney not later than the time required under your contract.

UTILITIES. You should evaluate what utilities you will require and check to be sure that the utilities available in the area suit your needs. Some structures may or may not have utilities and electrical facilities to support many modern appliances or equipment.

WATER WELLS. If the property you buy has a water well, you should have, and the lender may require, the equipment inspected and water tested. You should also determine if the county requires any registration or other action in order for you to begin using the water well.

TEXAS ASSOCIATION OF REALTORS®
INFORMATION ABOUT SPECIAL FLOOD HAZARD AREAS

USE OF THIS FORM BY PERSONS WHO ARE NOT MEMBERS OF THE TEXAS ASSOCIATION OF REALTORS® IS NOT AUTHORIZED.
©Texas Association of REALTORS®, Inc., 2014

CONCERNING THE PROPERTY AT 121 JASMINE CT
DRIFTWOOD, TX 78619

A. FLOOD AREAS:

- (1) The Federal Emergency Management Agency (FEMA) designates areas that have a high risk of flooding as special flood hazard areas.
- (2) A property that is in a special flood hazard area lies in a "V-Zone" or "A-Zone" as noted on flood insurance rate maps. Both V-Zone and A-Zone areas are areas with high risk of flooding.
- (3) Some properties may also lie in the "floodway" which is the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge a flood under FEMA rules. Communities must regulate development in these floodways.

B. AVAILABILITY OF FLOOD INSURANCE:

- (1) Generally, flood insurance is available regardless of whether the property is located in or out of a special flood hazard area. Contact your insurance agent to determine if any limitations or restrictions apply to the property in which you are interested.
- (2) FEMA encourages every property owner to purchase flood insurance regardless of whether the property is in a high, moderate, or low risk flood area.
- (3) A homeowner may obtain flood insurance coverage (up to certain limits) through the National Flood Insurance Program. Supplemental coverage is available through private insurance carriers.
- (4) A mortgage lender making a federally related mortgage will require the borrower to maintain flood insurance if the property is in a special flood hazard area.

C. GROUND FLOOR REQUIREMENTS:

- (1) Many homes in special flood hazard areas are built-up or are elevated. In elevated homes the ground floor typically lies below the base flood elevation and the first floor is elevated on piers, columns, posts, or piles. The base flood elevation is the highest level at which a flood is likely to occur as shown on flood insurance rate maps.
- (2) Federal, state, county, and city regulations:
 - (a) restrict the use and construction of any ground floor enclosures in elevated homes that are in special flood hazard areas.
 - (b) may prohibit or restrict the remodeling, rebuilding, and redevelopment of property and improvements in the floodway.
- (3) The first floor of all homes must now be built above the base flood elevation.
 - (a) Older homes may have been built in compliance with applicable regulations at the time of construction and may have first floors that lie below the base flood elevation, but flood insurance rates for such homes may be significant.

- (b) It is possible that modifications were made to a ground floor enclosure after a home was first built. The modifications may or may not comply with applicable regulations and may or may not affect flood insurance rates.
- (c) It is important for a buyer to determine if the first floor of a home is elevated at or above the base flood elevation. It is also important for a buyer to determine if the property lies in a floodway.
- (4) Ground floor enclosures that lie below the base flood elevation may be used only for: (i) parking; (ii) storage; and (iii) building access. Plumbing, mechanical, or electrical items in ground floor enclosures that lie below the base flood elevation may be prohibited or restricted and may not be eligible for flood insurance coverage. Additionally:
 - (a) in A-Zones, the ground floor enclosures below the base flood elevation must have flow-through vents or openings that permit the automatic entry and exit of floodwaters;
 - (b) in V-Zones, the ground floor enclosures must have break-away walls, screening, or lattice walls; and
 - (c) in floodways, the remodeling or reconstruction of any improvements may be prohibited or otherwise restricted.

D. COMPLIANCE:

- (1) The above-referenced property may or may not comply with regulations affecting ground floor enclosures below the base flood elevation.
- (2) A property owner's eligibility to purchase or maintain flood insurance, as well as the cost of the flood insurance, is dependent on whether the property complies with the regulations affecting ground floor enclosures.
- (3) A purchaser or property owner may be required to remove or modify a ground floor enclosure that is not in compliance with city or county building requirements or is not entitled to an exemption from such requirements.
- (4) A flood insurance policy maintained by the current property owner does not mean that the property is in compliance with the regulations affecting ground floor enclosures or that the buyer will be able to continue to maintain flood insurance at the same rate.
- (5) Insurance carriers calculate the cost of flood insurance using a rate that is based on the elevation of the lowest floor.
 - (a) If the ground floor lies below the base flood elevation and does not meet federal, state, county, and city requirements, the ground floor will be the lowest floor for the purpose of computing the rate.
 - (b) If the property is in compliance, the first elevated floor will be the lowest floor and the insurance rate will be significantly less than the rate for a property that is not in compliance.
 - (c) If the property lies in a V-Zone the flood insurance rate will be impacted if a ground floor enclosure below the base flood elevation exceeds 299 square feet (even if constructed with break-away walls).

E. ELEVATION CERTIFICATE:

The elevation certificate is an important tool in determining flood insurance rates. It is used to provide elevation information that is necessary to ensure compliance with floodplain management laws. To determine the proper insurance premium rate, insurers rely on an elevation certificate to certify building elevations at an acceptable level above flood map levels. If available in your area, it is recommended that you obtain an elevation certificate for the property as soon as possible to accurately determine future flood insurance rates.

You are encouraged to: (1) inspect the property for all purposes, including compliance with any ground floor enclosure requirement; (2) review the flood insurance policy (costs and coverage) with your insurance agent; and (3) contact the building permitting authority if you have any questions about building requirements or compliance issues.

PROTECTING YOUR HOME FROM MOLD

JUNE 2002

Mold growth problems can adversely affect many homeowners in Texas. Homeowners who act quickly and appropriately can prevent or correct conditions that may cause mold growth. The Texas Department of Health (TDH) and Texas Department of Insurance (TDI) prepared this publication to help you understand the concerns related to mold growth and to provide some effective steps you can take to help prevent mold growth. The following information will help protect your investment in your home and may prevent the possibility of health risks due to mold exposure.

If you are a renter, you should contact your landlord or property manager immediately when you have a maintenance need related to water damage.

WHAT ARE MOLDS?

Molds are microscopic organisms commonly found both indoors and outdoors. Molds, along with mushrooms and yeast, are known scientifically as fungi. Their purpose in nature is to break down dead material and recycle nutrients in the environment. For molds to grow and reproduce, they need a food source - any organic material, such as leaves, wood, paper, or dirt - and moisture. Since molds grow by "eating" the organic material, they gradually destroy whatever they are feeding on. Mold growth on surfaces can often be seen as a colored spot, frequently green, gray, brown, black or white. It commonly appears as a powdery, fuzzy, or hair-like material. Actively growing molds typically produce odors, sometimes described as earthy or moldy, or like mildew, old dirty socks, or ammonia. Molds release thousands of microscopic spores, which are lightweight, easily airborne and carried by air currents to surrounding areas. The spores must have both food and moisture to actually start growing, similar to plant seeds.

WHAT DO I DO IF A LEAK OCCURS?

Whether or not the water damage may be covered by your insurance policy, it is important to act quickly to prevent further damage to your home.

- Immediately stop the source of leak or flooding.
- Remove excess water with mops or a wet vacuum. If the damage is significant, consider contacting a water extraction company for immediate action.
- Whenever possible, move wet items to a secure, dry and well-ventilated area or outside to expedite drying.
- Protect repairable and undamaged items from further damage.
- Move rugs and pull up areas of wet carpet as soon as possible.
- Increase circulation in and around wet areas by opening closet and cabinet doors, moving furniture away from walls and running fans.
- If necessary, remove wallboard and flooring materials to dry out those areas.
- Don't throw away removed or damaged materials until instructed by your insurance company.
- Dry any damp or wet building materials and furnishings within 24-48 hours.
- Keep all receipts, photos and other relevant documents.
- Contact your insurance company, if applicable.

NOTE: The sooner the affected areas dry out and the source of the leak is repaired, the better your chances of minimizing damage to your property. If the water cannot be removed and the area dried promptly and efficiently, consider contacting a water extraction company for immediate action.

WHY ARE MOLDS A CONCERN?

Damage to the Home

It is common to find mold spores in the air inside homes, and on most surfaces including clothes, walls, and furniture. Most of the time mold spores found indoors come from outdoor sources. Routine cleaning of your home and furnishings helps keep these levels low. Cleaning small areas of visible mold, such as mold that may occur around your shower, is necessary to prevent unsanitary conditions.

The level of concern greatly increases when there are large amounts of active mold growth in your home. Large-scale mold problems are most likely to occur when there has been an on-going water leak, a flood, or very high levels of humidity in the home. Indoor mold growth may cause very high levels of airborne mold spores, which, in turn, may cause the spread of mold growth from the original source to other areas of the home where high moisture levels exist. Extensive mold growth can damage your home and belongings, such as carpets, sofas and cabinets. In time, unchecked mold growth can cause damage to the structural elements in your home. While there is no practical way to eliminate all mold and mold spores in the indoor environment, keeping your home clean and dry can prevent extensive mold growth and its related damage.

Health Effects

The vast majority of people are exposed to small amounts of mold or their spores on a daily basis without evident harm. However, mold growing inside a home is an unsanitary condition that may present potential health risks to occupants. Therefore, it is always best to identify and correct high moisture conditions quickly before mold grows and possible health problems develop.

Potential health effects produced by molds may include allergic, irritating, or toxigenic effects, and rarely, infection. Allergic reactions are generally the most common health effect. Typical symptoms (alone or in combination) reported by people living in moldy homes include:

- respiratory problems, such as wheezing, difficulty breathing, and shortness of breath
- sneezing and/or nasal congestion
- eye irritation (itching, burning, watery, or reddened eyes)
- coughing or throat irritation
- skin rashes or irritation
- headaches
- fatigue

The potential health effects depend on the amounts and types of mold present, the length and frequency of exposure, and the sensitivity and health condition of exposed individuals. While many people seldom experience ill effects from mold exposures, some may develop very serious illnesses. Some persons exposed to mold or mold spores may become sensitized and develop allergies to the mold or other health problems. Even "dead" mold (including spores and pieces of mold) may still cause allergy, irritation, or toxigenic reactions. Thus, killing mold without removing the residue may still be a health concern. Complete removal and thorough cleanup of mold is the safest solution.

Individuals at greater risk who may experience more severe symptoms or become ill more rapidly than others include:

- individuals with existing respiratory conditions, such as allergies, asthma, or chemical sensitivities
- individuals with weakened immune systems due to conditions such as HIV infection or cancer treatment
- infants and young children
- the elderly

Anyone with a health problem they believe may be due to mold exposure should consult a medical professional.

RESOURCES

For additional information, consult the mold and/or indoor air quality resources at the following:

1-800-252-3439

Since you cannot remove all food sources for molds, it is important as a homeowner to take sensible precautions to prevent moisture from creating a breeding ground for mold.

MOISTURE CONTROL

- Maintain levels of humidity below 60% (preferably between 30% and 50%) by
 - venting bathrooms, dryers and other moisture-generating sources to the outside
 - avoiding blockage of air conditioning vents
 - using air conditioners and de-humidifiers
 - increasing ventilation by installing additional crawlspace and attic vents, opening windows or installing an air-to-air heat exchanger
 - using exhaust fans when cooking, dishwashing and cleaning
 - avoiding the use of unvented heaters or high heat in confined areas
 - setting the air conditioning thermostat to "auto" to prevent circulation of humid air.
- Add insulation to reduce the potential for condensation on cold surfaces (windows, piping, exterior walls, roof or floors).
- Consider using moisture sensors that sound an audible alarm when a leak occurs.

OTHER PRECAUTIONS

- **Water Valve** - Make sure everyone in the household knows where the main valve is located and how to turn the water off.
- **Rain Gutters and Downspouts** - Direct rainwater away from your home. Keep gutters clear and make sure downspouts are long enough to effectively carry water away from your foundation. Gutters that are filled with leaves and other debris allow water to back up on the roof, which can result in water damage to eaves and roofing material.
- **Insulate Pipes and Outside Faucets** - Minimize the potential for water damage from frozen, broken pipes by insulating supply lines (in attic, crawlspaces and exterior walls), protecting exposed outdoor faucets, sealing gaps in exterior walls and maintaining adequate heat in your home.
- **Sump Pump** - The sump pump is the first line of defense in preventing water seepage into basements. Periodically check the sump and remove any debris that could clog the pump. Consider installing a battery-powered backup to protect your basement during power outages.
- **Don't block weep holes** - Weep holes are openings at the foundation level of a brick wall that allow moisture to escape from behind the wall. Do not close or block these openings.
- **Monitor Utility Bills** - An abnormally high water bill could signal a water leak.
- **Before You Travel** - Turn the water off at the main valve or at major appliances. While you are away, consider leaving a house key and contact information with a neighbor or trusted friend and ask the person to check the inside and outside of your home periodically while you are away.

PREVENTION

- Purchase paint with EPA approved mold inhibitors
- Clean bathrooms often with mold killing products and keep surfaces dry
- Do not carpet bathrooms, basements, kitchens or other areas prone to collect moisture
- Repair damages that could lead to water intrusion promptly and properly
- Ensure that the home has adequate ventilation, including exhaust fans in the kitchen and bathrooms

INSPECTION

Inspect your home regularly for the indications and sources of indoor moisture. Establish a maintenance schedule to check the following sources of water leaks on a regular basis. Contact a maintenance or service company with any questions or concerns.

- **Hot Water Heaters** - Over time, these appliances may rust or develop cracks, and the resulting leaks can be very costly. Check your water heater for rust and deterioration every year. Check the drain pan for water and ensure that the drain line for the overflow pan is not clogged. Drain and clean the water heater as recommended by the manufacturer.
- **A/C Drain Lines** - Damage can occur when the line that drains condensation from the evaporator coils becomes clogged and water overflows from the drip pan. To prevent this, periodically check the drip pan for water and consider an annual inspection or service call to reduce the buildup of algae and mold in the drain line.
- **Appliance Hoses** - Broken hoses are among the most common causes of water damage. Regularly inspect hoses and hose fittings on washing machines, icemakers and dishwashers for kinks, cracks, bulges or evidence of deterioration. Replace standard rubber washing machine hoses every two to five years, or more frequently if they are showing signs of water. Consider using steel-reinforced hoses for longer life.
- **Showers, Tubs, Sinks and Toilets** - Water that leaks from around bathtubs, showers, sinks and toilets can cause extensive damage because the leak is often hidden from view. To prevent leaks, make sure you have a continuous watertight seal of caulk around the edges of sinks, toilets, tubs and shower stalls. Cracks or mold on the caulk or on the grout at tiles on walls or shower floors may indicate that you do not have a watertight seal. Remove all caulk or grout, clean and dry the surface thoroughly, and apply fresh caulk. Do not apply new caulk or grout on top of the old materials.
- **Visible Piping** - Routinely check piping under cabinets and sinks for leaks, rust and evidence of deterioration.
- **Waste/Garbage Disposal System** - Routinely check for cracking or other sources of leaks in the waste disposal system.
- **Caulking around Windows, Doors, Penetrations and Cracks** - Windows and doors should have a continuous bead of caulk sealing them to the exterior surface of the home. Penetrations of the exterior walls by pipes, electrical conduit, phone or cable lines, and exhaust ducts should also be caulked. Cracks or mold on the caulk may indicate that you do not have a watertight seal. Remove all caulk, clean and dry the surface thoroughly, and apply fresh caulk. Do not apply new caulk on top of the old caulk.
- **Attic and Ceilings** - Routinely check for wet insulation and water stains.
- **Wallpaper** - Routinely check for bubbling and/or peeling, as well as pink or black stains.
- **Roofs** - Keep roofs free of debris that can damage roofing material and allow water to seep in. Trim tree branches to prevent them from rubbing and damaging the roof. Promptly repair missing or damaged shingles. Properly seal any cracks around chimneys, skylights and vents. Check metal flashing for holes, cracks or other damage. Replace flashing or use silicon caulk to seal any openings.
- **Landscape** - Yards should slope away from the house to prevent puddling near the foundation or under pier and beam houses.
- **Sprinklers and Irrigation System** - Do not allow sprinklers or sprinkler heads to soak the exterior of the home.
- **Check for evidence of water stains or odors, particularly after rains, on areas that could get wet.**

POTENTIAL SIGNS OF MOLD GROWTH

- Unexplained discoloration on any surface
- Musty odor
- Dark spots on or around vents
- Water stains anywhere
- Peeling or curling of vinyl floors or wallpaper

TEXAS ASSOCIATION OF REALTORS®
INFORMATION ABOUT PROPERTY INSURANCE FOR A BUYER OR SELLER

USE OF THIS FORM BY PERSONS WHO ARE NOT MEMBERS OF THE TEXAS ASSOCIATION OF REALTORS® IS NOT AUTHORIZED.
©Texas Association of REALTORS®, Inc. 2014

A. The availability and the affordability of property insurance may affect both the buyer and the seller.

Typically a buyer will seek to insure the property. Most mortgage lenders require that the property be insured in an amount not less than the loan amount. The failure to obtain property insurance at or before closing may delay the transaction or cause it to end, either of which can impose both inconvenience and cost to both the buyer and the seller.

B. There are a number of factors that affect the availability and affordability of insurance.

- (1) The level of coverage will significantly affect the cost of insurance. There are several levels of insurance coverage. For example:
 - (a) a policy may cover the replacement cost of the improvements and the replacement cost of many personal items in the property in the event of most casualties;
 - (b) a policy may cover only value of the improvements and exclude many casualties; or
 - (c) a policy may cover casualties and costs between the two noted extremes under (a) and (b).
- (2) Coverage levels and prices vary from company to company. There are many insurance companies conducting business in Texas who offer a variety of insurance products at various prices.
 - (a) One insurance company may refuse to insure a particular property or person while another insurance company may elect to do so.
 - (b) One insurance company may charge a significantly lower premium than another insurance company for the same or similar coverage.
 - (c) Generally, each insurance company has specific guidelines by which it prices its insurance policies. The following are examples of criteria that an insurance company may use in evaluating an application for insurance. The criteria vary from company to company.
 - (1) Past claims filed against the property to be insured in the 5 years preceding the application.
 - (2) Past claims filed by the applicant to be insured in the 5 years preceding the application.
 - (3) The applicant's insurance credit score.
 - (4) The past relationship between the insurance company and the applicant.
 - (5) The physical characteristics of the property such as condition, age, location, or construction materials.

C. Most insurance companies participate in the Comprehensive Loss Underwriting Exchange (CLUE) and obtain a CLUE report to evaluate the claims history of the property and the applicant.

- (1) Most insurance companies contribute information about claims to an insurance industry database known as CLUE (a registered trademark of Equifax, Inc.). An insurance company obtains a CLUE report when evaluating an application for insurance.
- (2) A CLUE report contains information about the claims history of the property and of the applicant for insurance.
 - (a) The CLUE report contains only data and does not inform the buyer or seller whether insurance is or is not available or at what cost.
 - (b) Insurance companies use the CLUE report in different ways.
 - (c) It is best to speak with an insurance agent with respect to how the information in a particular CLUE report affects the affordability and availability of insurance.

- (3) While CLUE reports are generally accurate, there may be errors in the reports.
 - (a) An event may be listed as a claim even though the insurance company did not pay any proceeds (for example, the cost of repair did not exceed the deductible or an inquiry may be incorrectly classified as a claim).
 - (b) Federal law permits a person to challenge inaccurate information. One may contact the administrator of the CLUE report (Lexis-Nexis) to correct information in a CLUE report.
- (4) A property owner may, for a fee, obtain the CLUE report on his or her property through companies such as Lexis-Nexis (<https://personalreports.lexisnexis.com>, 1-866-312-9076), A-Plus (800-709-8842) or other companies, most of whose services are accessible via the Internet. An owner may also contact the Equifax Insurance Consumer Center at 800-456-6004.

D. Promptly after entering into a contract to buy a property in Texas, the buyer should take the following steps to avoid delays in closing and to avoid additional costs.

If the buyer has the option to terminate the contract, the buyer should make sure that the buyer and the insurance agent have completed the following steps before the option expires.

- (1) Contact one or more insurance agents.
 - (a) The buyer should discuss the various levels of coverage with an insurance agent and ask questions that are necessary so the buyer understands the levels of available coverage.
 - (b) Insurance agents can provide applicants with written summaries of the various coverage levels.
 - (c) Basic summaries are available at the websites noted in Paragraph E.
- (2) **Submit an application** for insurance with the insurance agent of the buyer's choice.
 - (a) Applying for insurance promptly after entering into a contract to buy a property helps avoid surprises or delays in closing the transaction.
 - (b) Prompt application permits the buyer time to evaluate various coverage levels and prices.
 - (c) Delaying the application for insurance may limit opportunities to obtain the most suitable coverage and may limit opportunities to address any unforeseen problems or delays in obtaining coverage.
 - (d) In recent years, many transactions have been delayed or terminated because of problems associated with obtaining insurance.
- (3) Ask for written confirmation from the insurance agent that the insurance company:
 - (a) has received the application;
 - (b) has reviewed the applicant's CLUE report; and
 - (c) has conducted all necessary reviews to issue a policy at the particular price quoted (some insurance companies may ask for specific information or may wish to inspect the property).
- (4) Verify that the insurance coverage the buyer chooses is acceptable to the buyer's lender.

E. If one is not able to obtain insurance at a reasonable price or more information is needed, contact the Texas Department of Insurance (www.helpinsure.com or www.tdi.state.tx.us).

OMB Approval No: 2502-0538
(exp. 07/31/2009)

For Your Protection: Get a Home Inspection

Why a Buyer Needs a Home Inspection

A home inspection gives the buyer more detailed information about the overall condition of the home prior to purchase. In a home inspection, a qualified inspector takes an in-depth, unbiased look at your potential new home to:

- ✓ Evaluate the physical condition: structure, construction, and mechanical systems;
- ✓ Identify items that need to be repaired or replaced; and
- ✓ Estimate the remaining useful life of the major systems, equipment, structure, and finishes.

Appraisals are Different from Home Inspections

An appraisal is different from a home inspection. Appraisals are for lenders; home inspections are for buyers. An appraisal is required to:

- ✓ Estimate the market value of a house;
- ✓ Make sure that the house meets FHA minimum property standards/requirements; and
- ✓ Make sure that the property is marketable.

FHA Does Not Guarantee the Value or Condition of your Potential New Home

If you find problems with your new home after closing, FHA can not give or lend you money for repairs, and FHA can not buy the home back from you. That is why it is so important for you, the buyer, to get an independent home inspection. Ask a qualified home inspector to inspect your potential new home and give you the information you need to make a wise decision.

Radon Gas Testing

The United States Environmental Protection Agency and the Surgeon General of the United States have recommended that all houses should be tested for radon. For more information on radon testing, call the toll-free National Radon Information Line at 1-800-SOS-Radon or 1-800-767-7236. As with a home inspection, if you decide to test for radon, you may do so before signing your contract, or you may do so after signing the contract as long as your contract states the sale of the home depends on your satisfaction with the results of the radon test.

Be an Informed Buyer

It is your responsibility to be an informed buyer. Be sure that what you buy is satisfactory in every respect. You have the right to carefully examine your potential new home with a qualified home inspector. You may arrange to do so before signing your contract, or may do so after signing the contract as long as your contract states that the sale of the home depends on the inspection.

TO: _____ (☒ Buyer (☐ Seller)
FROM: RE/MAX REAL PROPERTIES (Broker's Firm)
RE: 121 JASMINE CT, DRIFTWOOD, TX 78619 (Property)
DATE: _____

The attached list includes inspectors licensed by the Texas Real Estate Commission and may also include other persons authorized by law to perform certain inspections (for example, termite inspectors, engineers, electricians, or plumbers). The list is not a complete list of all inspectors that may perform inspections. You may also obtain a list from other sources (for example, the local telephone directory or the Internet).

This firm strongly recommends that you hire inspectors to help you evaluate the condition of the Property.

Inspections are of conditions which are *present* and *visible* at the time of the inspections. Property conditions change with time and use. Inspectors are not likely to point out small problems or defects that are not reasonably observable at the time of inspection. Inspectors will not move furniture, appliances, permanent coverings, or other obstructions. Neither inspectors nor real estate licensees can guarantee future performance of any item.

This firm does not recommend any particular inspector and does not warrant the quality of any inspector's inspection.

It is recommended that you accompany the inspectors during the inspections. You should address any questions about an inspection directly to your inspector.

Real estate licensees are not inspectors by virtue of their real estate licenses.

It may be necessary to make certain arrangements for the inspectors, such as providing access and turning on utilities.

Receipt of this notice is acknowledged and:

- ☐ I choose to hire an inspector.
☐ I choose not to hire an inspector.

121 JASMINE CT

TEXAS REAL ESTATE CONSUMER NOTICE CONCERNING HAZARDS OR DEFICIENCIES

Each year, Texans sustain property damage and are injured by accidents in the home. While some accidents may not be avoidable, many other accidents, injuries, and deaths may be avoided through the identification and repair of certain hazardous conditions. Examples of such hazards include:

- improperly installed or missing ground fault circuit protection (GFCI) devices for electrical receptacles in garages, bathrooms, kitchens, and exterior areas;
- improperly installed or missing arc fault protection (AFCI) devices for electrical receptacles in family rooms, dining rooms, living rooms, parlors, libraries, dens, bedrooms, sunrooms, recreation rooms, closets, hallways, or similar rooms or areas;
- ordinary glass in locations where modern construction techniques call for safety glass;
- the lack of fire safety features such as smoke alarms, fire-rated doors in certain locations, and functional emergency escape and rescue openings in bedrooms;
- excessive spacing between balusters on stairways and porches;
- improperly installed appliances;
- improperly installed or defective safety devices; and
- lack of electrical bonding and grounding.

To ensure that consumers are informed of hazards such as these, the Texas Real Estate Commission (TREC) has adopted Standards of Practice requiring licensed inspectors to report these conditions as "Deficient" when performing an inspection for a buyer or seller, if they can be reasonably determined.

These conditions may not have violated building codes or common practices at the time of the construction of the home, or they may have been "grandfathered" because they were present prior to the adoption of codes prohibiting such conditions. While the TREC Standards of Practice do not require inspectors to perform a code compliance inspection, TREC considers the potential for injury or property loss from the hazards addressed in the Standards of Practice to be significant enough to warrant this notice.

Contract forms developed by TREC for use by its real estate licensees also inform the buyer of the right to have the home inspected and can provide an option clause permitting the buyer to terminate the contract within a specified time. Neither the Standards of Practice nor the TREC contract forms requires a seller to remedy conditions revealed by an inspection. The decision to correct a hazard or any deficiency identified in an inspection report is left to the parties to the contract for the sale or purchase of the home.

This form has been approved by the Texas Real Estate Commission for voluntary use by its licensees. Copies of TREC rules governing real estate brokers, salesperson and real estate inspectors are available from TREC. Texas Real Estate Commission, P.O. Box 12188, Austin, TX 78711-2188, 512-936-3000 (<http://www.trec.texas.gov>)

This form is available on the TREC website at www.trec.state.tx.us

TEXAS ASSOCIATION OF REALTORS®

INFORMATION ABOUT MINERAL CLAUSES IN CONTRACT FORMS

USE OF THIS FORM BY PERSONS WHO ARE NOT MEMBERS OF THE TEXAS ASSOCIATION OF REALTORS® IS NOT AUTHORIZED.
©Texas Association of REALTORS®, Inc. 2014

This form contains general information about mineral estates in published contract forms.

- 1. INTRODUCTION:** Historically, buyers and sellers of property near urban areas have not been concerned about the conveyance or retention of mineral interests. Mineral interests for such properties may have been severed in the past or the value of the mineral interests may have been relatively insignificant. There has historically been little risk that the owner of the mineral interests under property near urban areas could or would access the surface of the property to drill or excavate for minerals (perhaps, because the property was too small to support such activity or because such activity may have been heavily regulated by a city). In recent years, the discovery of large mineral deposits near urban areas and advances in drilling technologies have led to increased exploration and drilling activities in and near urban areas. In turn, buyers and sellers of property in urban and suburban areas have raised questions as to whether it is best to convey or retain all or part of the mineral interests in a particular sale.
- 2. WHO OWNS THE MINERALS?** Owners of property in or near urban areas typically are not aware of the precise extent of the mineral interests they may own. One may own all or only a portion of the mineral interests. Further, the mineral interests may have been leased. Determining who owns the mineral interests, whether the mineral interests have been leased, and who holds rights under any leases requires an expert (such as an oil and gas attorney) to review the chain of title and formulate an informed opinion.
- 3. CONTRACT FORMS:** The residential contract forms promulgated by the Texas Real Estate Commission and the commercial contract forms published by the Texas Association of REALTORS® provide that the seller will convey to the buyer all of the seller's rights associated with the property, including all mineral interests and any rights held under any mineral leases by the seller. If a seller wishes to reserve all or a part of the mineral interests and rights held by the seller in a residential transaction, the seller **must** use the Texas Real Estate Commission's Addendum for Reservation of Oil, Gas, And Other Minerals (TREC No. 44-2, TAR No. 1905). If the addendum is not attached to the sales contract, the seller conveys to the buyer all of the mineral interests and rights held by the seller at the time of the transaction. In a farm & ranch transaction, the seller may use the TREC promulgated form, but may also use any addendum prepared by an attorney or by either party.
- 4. RESOURCES:** One may find information related to mineral estates and mineral leases through many sources, including but not limited to: (a) the Real Estate Research Center (www.recenter.tamu.edu); and (b) the Railroad Commission of Texas (www.rrc.state.tx.us). There are many other useful sources that one can access via the Internet through most Internet search engines.

The undersigned acknowledge receipt of this notice.

DISCLOSURE OF RELATIONSHIP WITH RESIDENTIAL SERVICE COMPANY

RESIDENTIAL SERVICE CONTRACTS. A residential service contract is a product under which a residential service company, for a fee, agrees to repair or replace certain equipment or items in a property. Co-payments typically apply to most service calls. Residential service companies are licensed and regulated by the Texas Real Estate Commission. The extent of coverage and the cost of coverage will vary. Before buying a residential service contract, the buyer should read the contract and consider comparing it with the extent of coverage and costs from several other residential service companies. You may obtain a list of the residential service companies licensed in Texas at <http://www.trec.state.tx.us> as well as a copy of their respective contracts. **YOU MAY CHOOSE ANY COMPANY.**

THE PURCHASE OF A RESIDENTIAL SERVICE CONTRACT IS OPTIONAL. The TREC promulgated residential contract forms contain a paragraph in which the parties may negotiate whether the seller will reimburse the buyer the cost of a residential service contract. The choice of the residential service company and extent of coverage lies with the buyer. **NEITHER A BROKER/SALESPERSON NOR A SELLER MAY CONDITION THE SALE OF A PROPERTY ON THE BUYER'S PURCHASE OF A RESIDENTIAL SERVICE CONTRACT.**

- | | |

121 JASMINE CT

RSC-1

NOTICE REGARDING OAK WILT IN CENTRAL TEXAS

ADDENDUM TO EARNEST MONEY CONTRACT BETWEEN THE UNDERSIGNED PARTIES CONCERNING THE PROPERTY AT:

121 Jasmine Ct. Driftwood, Texas 78619

THERE MAY BE OAK WILT ON THE PROPERTY THAT YOU ARE ABOUT TO PURCHASE

OAK WILT is one of the most destructive tree diseases in the United States. The disease has killed more than 1 million trees in Central Texas. Oak wilt is caused by the fungus *Ceratocystis fagacearum*. The spores of the fungus invade and clog the tree's water conducting system, call xylem.

Oak wilt has been found in over 60 counties and in almost every city in Central Texas. It can be a problem wherever live oaks tend to be the predominate tree. It does not matter whether they are transplanted or naturally grown. An individual tree's age, size or previous health status does not make it more or less likely to contract or die from oak wilt.

Live Oaks die in the greatest numbers, most often in expanding areas called Oak Wilt Centers. Red Oaks are the most susceptible. They typically die within 2-4 weeks of symptom appearance. Common red oaks are Spanish, Texas, Shumard, Pin, and Blackjack. White oaks are least susceptible. Very few have been identified with oak wilt in Texas. They generally survive for a number of years with the disease. Common White Oaks – Post, Bur, Chinkapin, Monterrey.

OUR EXPERTISE:

- We cannot make representations or guarantees because we are not trained in identifying the condition of trees and their diseases and have no expertise in the area of plant diseases.

THEREFORE, WE RECOMMEND:

- That you take whatever other measure you feel is necessary to satisfy yourself about the condition of the property and its surroundings.
- That you accompany the inspectors and other experts during their inspections and ask any questions you have about the property.

Other Information: If you are concerned or desire additional information, you may call your County Agricultural Extension Service, or if you have access to the internet, go to
