

WIMAS Point of Diversion Information Sheet

Water Right Information represents conditions as of 07/20/2015.

Information shown on this page depends on the **water right(s)** and their **Type(s) of Use** associated with a PD. If there are multiple water rights and types of use, the page will update details, quantity and rate, and reported water use depending on which entry is selected from those list boxes.

Because water rights can overlap both in points of diversion and places of use (which in turn can affect the authorized quantities and rate) AND water usage is often aggregated into a single report, **you cannot determine if a water right has reported more water use than authorized from this page only.**

By using this page directly, you agree to the responsibilities and use limitations of the WIMAS program, as specified by its [disclaimer](#).

Point of Diversion
