CSR/CSR2 UPDATE: In January, 2014, the USDA Natural Resources Conservation Service (NRCS) released a soil survey update containing a Corn Suitability Rating (CSR) for Iowa soils based on a revised formula referred to as CSR2. For any given farm, the CSR values based on the CSR2 formula may be significantly different than the original CSR values published prior to January, 2014. Additionally, the current soil survey may contain soil types that are not found in pre-January, 2014 surveys, which will result in the CSR being reported as a null value. As the market transitions to the new CSR2 formula, we are providing both CSR and CSR2 values where both values are available. If a soil type does not have a CSR value, and is being reported as a null value, we are providing the weighted CSR based on the pre-January, 2014 soil survey data.
