Re: Soil evaluation in Ingham Township, Section 28, east side of Clark Road,
Applications #4-15-05-107 & 4-15-05-108, Part of Tax ID no. 33-11-11-35-400-006.

Dear Mr. Welton:

On April 26, 2005, I conducted a soils evaluation to ascertain the suitability of the above mentioned properties for an on-site sewage disposal and final treatment system. The results of this evaluation are enclosed in this letter.

Backhoe cuts 1, 3 through 7 for parcels 1 & 2 meet minimum Ingham County requirements for a conventional on-site septic system. The Ingham County Health Department can issue a permit for a conventional septic system where we found acceptable soils.

If you have any questions or concerns, please call our office at (517) 887-4312.

Sincerely,

William Haun, R.E.H.S.
