LAND USE

H. Mixed Use Development (MXD)

The intent of the Mixed Use Development (MXD) designation is to identify those areas where innovative land use concepts are encouraged. Application of this district should be with prudence, and should be only to those areas where traditional land use classifications do not afford the desired flexibility and community input in land use planning necessary to address local concerns. Candidates for this district include all I-95 interchange areas, the St. Lucie County International Airport, Community Development Districts created pursuant to Chapter 190, Florida Statutes and areas of special or unique environmental consideration that may not be appropriate for traditional land use designations.

Uses within the areas classified as Mixed Use should be segregated as to intensity and indicated in the form of a concept master plan which is to be included as a part of the land use designation process. The following criteria, in addition to those as cited in Objective 1.1.7, are to be used in the development of Mixed Use areas:

- Unless otherwise compliant with the identified intensity classification, any change in zoning shall be to the Planned Unit Development (PUD), Planned Non-Residential Development (PNRD) or Planned Mixed Use Development (PMUD), as described in the St. Lucie County Land Development Code. Those properties with compatible existing zoning designations are encouraged to develop under the PUD, PNRD or PMUD regulations.
- Residential development shall be regulated by the intensity district in which it is to take place. In no case should gross residential density exceed 15 du/ac.
- All uses shall be compatible with internal and external adjacent land uses.
