Welcome to MySH130.com: Your Information Source for SH 130 Segments 5 & 6

SH 130 Segments 5 & 6 will span 40 miles through Travis, Caldwell and Guadalupe counties, from south of Austin to I-10 near Seguin. Segments 5 & 6 are a continuation of the northern segments of SH 130, which extend from Georgetown in Williamson County to Mustang Ridge in southeast Travis County. SH 130 is intended to provide an alternative to the congestion of I-35 in Central Texas. The roadway is projected to open in late 2012, and I am pleased to say that we are on schedule.

Our website is designed to help keep you informed of the project progress and to address any questions you may have about the road. I encourage you to explore this site; you will find information, maps and other documents helpful in learning more about SH 130. We are also interested in hearing from you; please send any questions or comments to us using the Get Connected tab.

Our goal is to facilitate a safe and convenient highway for commuters and long distance travelers. We are proud to be considered one of the solutions that Texans can depend upon for safe and reliable transportation. We are working to provide this vital roadway so you can arrive home to your family safer and quicker, resulting in a better quality of life.

I hope you are as excited as I am about the numerous positive impacts that this new transportation option will have on Central Texas for years to come.

Sincerely,

Javier Gutierrez
