

An aerial photograph of a rural landscape, likely a farm or agricultural area. The terrain is divided into various fields and pastures, some of which are green, suggesting vegetation, while others are brown or tan, indicating bare soil or dry grass. A prominent red polygon is drawn on the image, outlining a specific area of interest. This area is roughly rectangular but has several irregularities, including a small protrusion on the right side and a notch on the top edge. The red line is thick and clearly visible against the natural colors of the landscape. The overall image has a slightly grainy, high-resolution appearance, typical of aerial photography used in land management or planning.

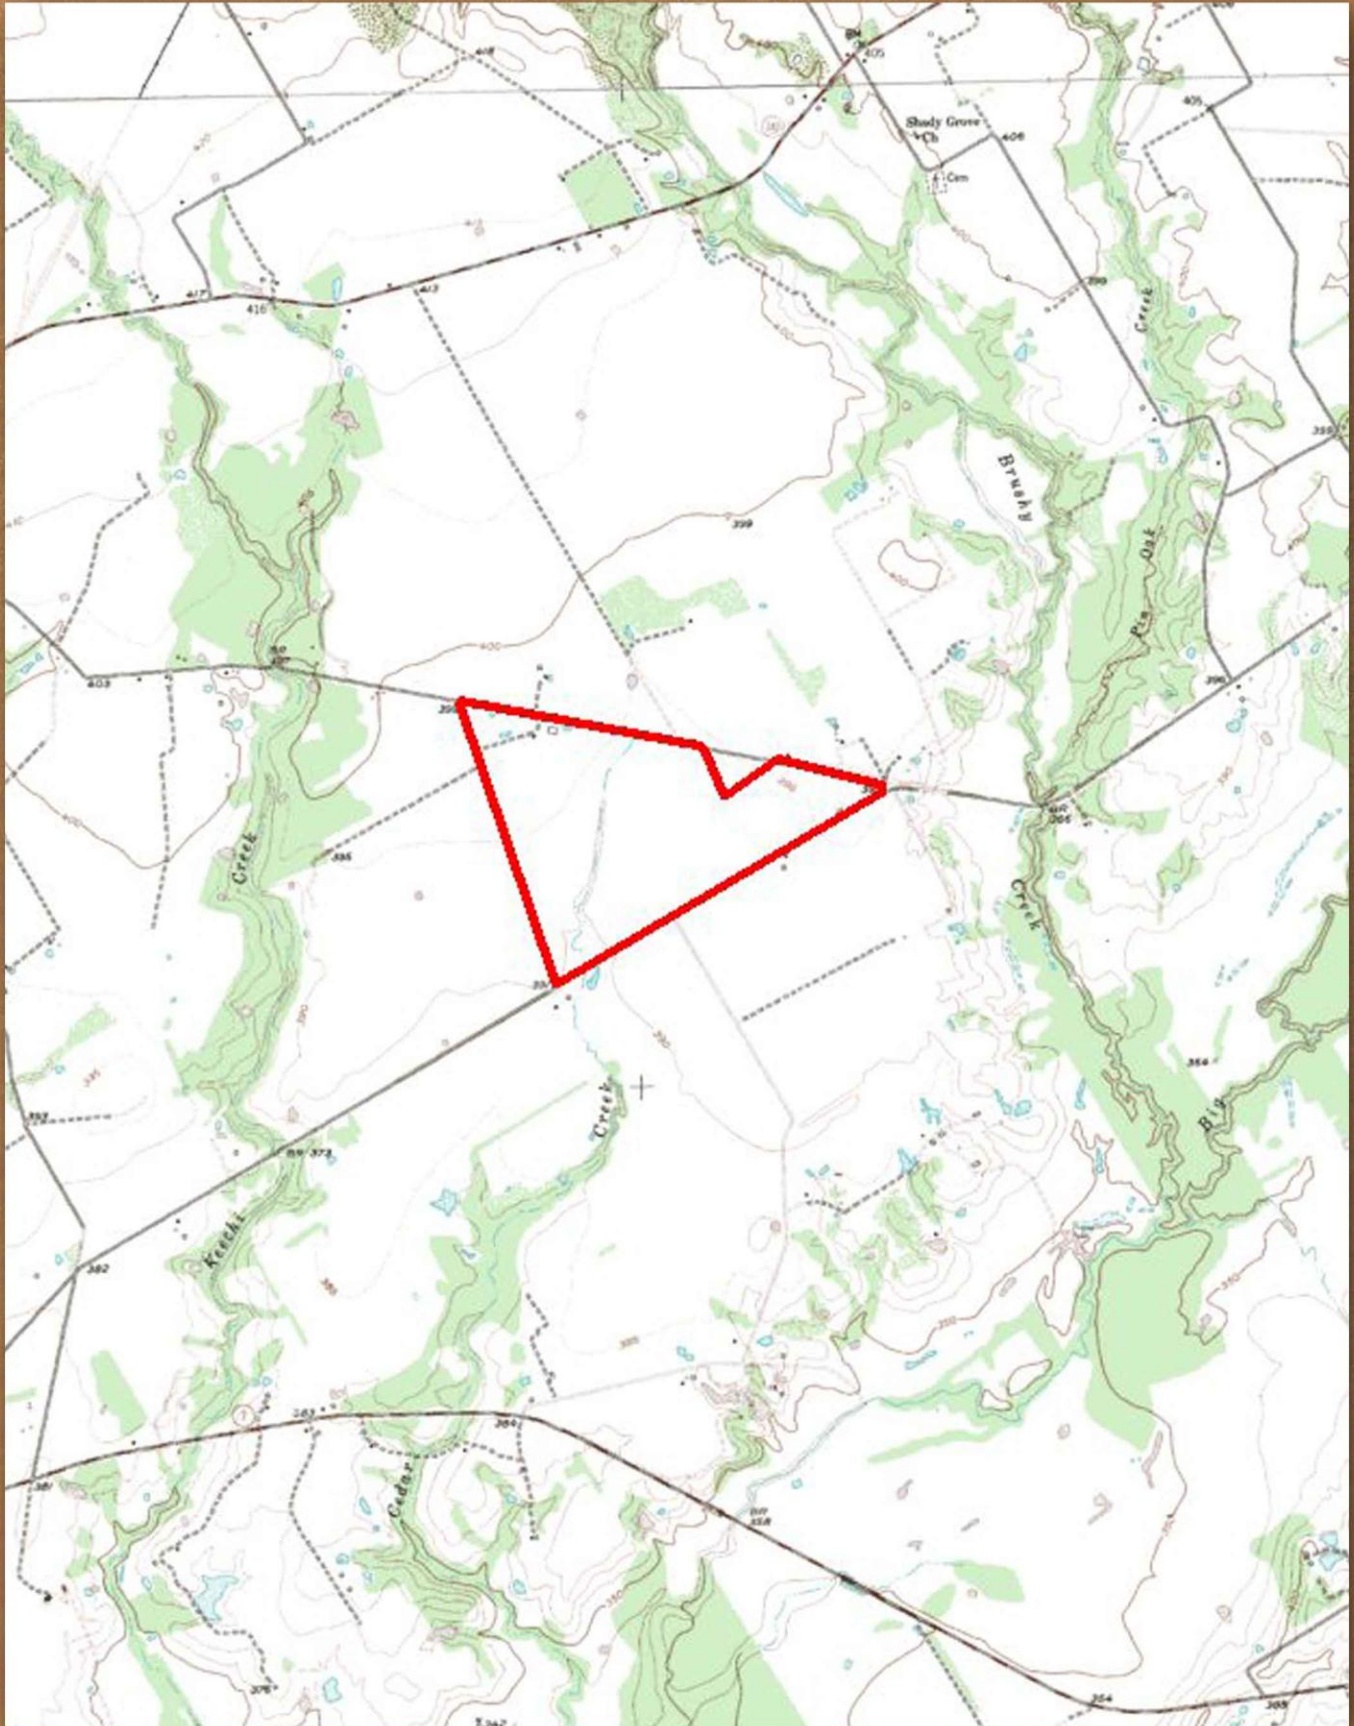

Boundary Lines Are An Approximation And Are Not Exact
