Salish Shores Domestic Water System

For the benefit of the Salish Shores I, II, III & IV, Tradewinds Commercial Lots and Leufkens Commercial Park Tracts 1 – 5 property owners, and for their exclusive use, there is installed and maintained a state approved domestic water system, which provides domestic potable water to all properties within these sub divisions.

For the continued protection of the water supply, the water will be tested and approved by the State of Montana as required by law. Only qualified trained operators will operate, repair, replace, take samples, test and keep records of test data for the State of Montana.

The entire system is engineered and inspected by a licensed Montana mechanical engineer. The inspections will be conducted on a regular basis to insure against cross connections or contamination.

There is a \$1,250 hook up charge.

New construction and adaptable to old construction need to have a siphon proof connection.

Sprinkler systems need to be connected to a presser vacuum breaker. This is to attempt to meet upcoming standers for cross connections.
