Disclosure statement additional information

1A Occupancy – Not sure how to classify this. It is a rustic second home used regularly and seasonally by extended families.

3B- my understanding is the unincorporated areas of Fannin County do not have zoning applied. This property is described though as "A5 – Agriculture use".

4F- dead or diseased trees – On 133 acres of mostly woodlands I am certain there are some dead an/or diseased trees. However, I am aware no substantial areas of dead and diseased trees that would indicate any sort of issue outside the ordinary life cycle of forest land.

5B- Toxic substances – We have no recollection or knowledge of any testing of this sort during our ownership or prior, but a previous owner may have.

6G- There was a functional well on the property when we purchased it. We have improved the well as follows –

- Sometime around 2000- added a filter and backwash timer to remove what had been identified as iron/ rust when water was tested. It was described to us as harmless but the filter was added to improve the taste and general quality of the water, which it did.
- 2011- The old well house structure was removed and a new structure of treated wood and hardie plank was built. Insulation was added in order to allow the well and backwash filter to remain functional over the winter months.
- 2012- A new pressure tank and related valves and piping was installed to the well system.
- 2018- A sustained power outage caused a pipe to freeze and split, which resulted in soaking a portion of the fiberglass insulation inside the well house. The most of the damaged insulation has been removed but replacement insulation has not been installed yet as of may 30 2018.

6H- the property was enrolled in the Georgia Conservation Use Program for rural/agriculture for a 10 year period.

7- Agriculture/forestry use – I believe most of our boundaries are with land identified as having this use.
