It has great blacktop access, 11.69 acres of CRP, potential on a REC/Hunt lease that's been in place, and tillable acres to drive up the income. In addition, the seller would be interested in a couple year leaseback on the tillable acres, which could lock in row crop income for the next few years. With all forms of income and lower Missouri property taxes, this farm is listed with over a 3.75% net return, which is hard to find in today's markets!
