## \*Proposed Improvement:

Home replacement

## \*Release Conditions

It is the responsibility of the owner to maintain a 5' minimum setback between the wastewater system and any part of the structure foundation, including porches, decks, and any other appurtenances. If you are unsure as to the exact location of the septic system, please have a licensed installer or inspector locate the septic system for you. The local county health department in no way implies that the proposed construction meets the required setbacks from the septic system unless otherwise noted. This release only shows that this property has an approved wastewater system that appears to have met the permitting requirements at the time it was installed.

This release in no way expresses or implies that the existing subsurface sewage treatment and disposal system serving the site will continue to function for any period of time.
