

Why we love our property:

287 Fisher Store Rd. is a symphony of birds. This is magical land and the more time you spend here, the deeper you fall in love. It is a slice of heaven on earth. We wanted to get this property set up so that a beautiful custom home can be built with privacy and very little in your line of sight, other than trees and landscaping. Having a well with water and an orchard full of fruit trees is a blessing. The two tiny homes we have are as nice as you can get. Our intention was to live in them while we build our dream home and then turn around and have them as guest houses and an office. Life is taking us in a different direction, possibly overseas, and so the dream we have been cultivating is now ready to be passed on to another family. This property has limitless potential- it is a healthy, happy, vibrant piece of land. You cannot beat the location and the accessibility to Austin. It is so private and sacred. We know you will enjoy it as much as we do. Sky's the limit.
