Based on past aerial imagery, the land primarily consists of 60± acres of 17± year old pine and 80± acres of 13± year old pine-hardwood mix. There are approximately 40 acres of rolling terrain, with the remaining acreage being Okahatta Creek bottomland. The internal trail system navigates through a portion of this tract and provides access to the four established food plots. The open pines, thickets and creek bottom offer a suitable environment for deer and turkey. Good bones are in place; a little mechanical work and controlled burning would further help the wildlife habitat.
