Mine or Quarry		Aerial Photography			
Miscellaneous Water					
Perennial Water					
Rock Outcrop					
Saline Spot					
Sandy Spot					
Severely Eroded Spot					
Sinkhole					
Slide or Slip					
Sodic Spot					

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Dodge County, Wisconsin
Survey Area Data: Version 19, Sep 6, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 20, 2020—Sep 15, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
EbA	Elburn silt loam, 0 to 3 percent slopes	7.4	23.3%
Gb	Granby variant fine sandy loam	0.9	2.9%
MrB	McHenry silt loam, 2 to 6 percent slopes	0.5	1.7%
MrC2	McHenry silt loam, 6 to 12 percent slopes, eroded	6.2	19.5%
Ph	Pella silty clay loam, cool, 0 to 2 percent slopes	5.5	17.3%
SdA	St. Charles silt loam, moderately well drained, 0 to 2 percent slopes	8.5	26.9%
W	Water	2.6	8.3%
Totals for Area of Interest		31.7	100.0%

Farmland Classification—Dodge County, Wisconsin
(Parcel 036-0913-1122-000_Krueger Acres)

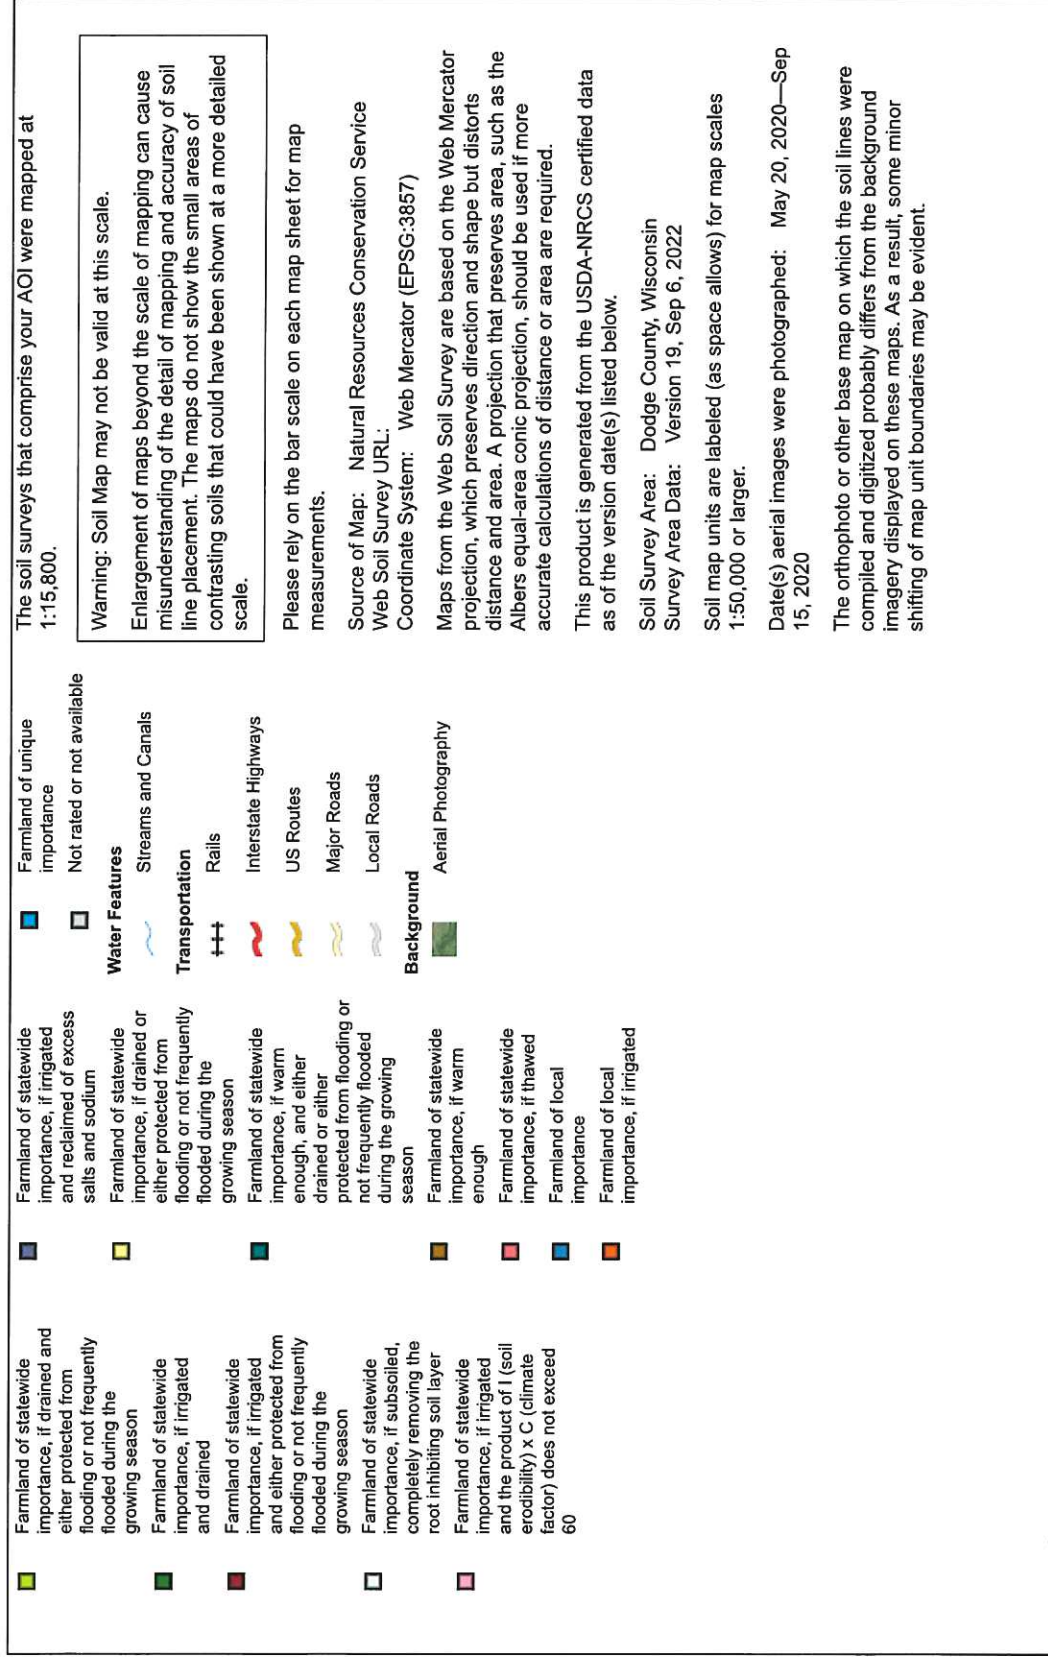

Farmland Classification—Dodge County, Wisconsin
(Parcel 036-0913-1122-000_Krueger Acres)

	Prime farmland if subsoiled, completely removing the root inhibiting soil layer		Farmland of statewide importance, if drained and either protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance, if irrigated and reclaimed of excess salts and sodium		Farmland of unique importance		Prime farmland if subsoiled, completely removing the root inhibiting soil layer
	Prime farmland if irrigated and the product of I (soil erodibility) x C (climate factor) does not exceed 60		Farmland of statewide importance, if irrigated and drained		Farmland of statewide importance, if drained or either protected from flooding or not frequently flooded during the growing season		Not prime farmland		Prime farmland if irrigated and the product of I (soil erodibility) x C (climate factor) does not exceed 60
	Prime farmland if irrigated and reclaimed of excess salts and sodium		Farmland of statewide importance, if irrigated and either protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance, if warm enough, and either drained or either protected from flooding or not frequently flooded during the growing season		Prime farmland if drained		Prime farmland if irrigated and reclaimed of excess salts and sodium
	Farmland of statewide importance		Farmland of statewide importance, if irrigated and either protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance, if warm enough, and either drained or either protected from flooding or not frequently flooded during the growing season		Prime farmland if protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance
	Farmland of statewide importance, if drained		Farmland of statewide importance, if subsoiled, completely removing the root inhibiting soil layer		Farmland of statewide importance, if warm enough		Prime farmland if irrigated		Farmland of statewide importance, if drained
	Farmland of statewide importance, if protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance, if irrigated and the product of I (soil erodibility) x C (climate factor) does not exceed 60		Farmland of statewide importance, if warm enough		Prime farmland if and either protected from flooding or not frequently flooded during the growing season		Farmland of statewide importance, if protected from flooding or not frequently flooded during the growing season
	Farmland of statewide importance, if irrigated				Farmland of local importance		Prime farmland if irrigated and drained		Farmland of statewide importance, if irrigated
					Farmland of local importance, if irrigated		Prime farmland if irrigated and either protected from flooding or not frequently flooded during the growing season

Farmland Classification

Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
EbA	Elburn silt loam, 0 to 3 percent slopes	Prime farmland if drained	7.4	23.3%
Gb	Granby variant fine sandy loam	Not prime farmland	0.9	2.9%
MrB	McHenry silt loam, 2 to 6 percent slopes	All areas are prime farmland	0.5	1.7%
MrC2	McHenry silt loam, 6 to 12 percent slopes, eroded	Farmland of statewide importance	6.2	19.5%
Ph	Pella silty clay loam, cool, 0 to 2 percent slopes	Prime farmland if drained	5.5	17.3%
SdA	St. Charles silt loam, moderately well drained, 0 to 2 percent slopes	All areas are prime farmland	8.5	26.9%
W	Water	Not prime farmland	2.6	8.3%
Totals for Area of Interest			31.7	100.0%

Description

Farmland classification identifies map units as prime farmland, farmland of statewide importance, farmland of local importance, or unique farmland. It identifies the location and extent of the soils that are best suited to food, feed, fiber, forage, and oilseed crops. NRCS policy and procedures on prime and unique farmlands are published in the "Federal Register," Vol. 43, No. 21, January 31, 1978.
