In rejecting a written request, the Committee should detail the reasons for rejection and suggest how the applicant could remedy the deficiencies.

ARTICLE 3 - Exterior Maintenance

3.01. Any residence or business constructed on a Lot must have a ground floor area of not less than 800 square feet (exclusive of outbuildings, guest houses, porches, garages and servants' quarters), except for approved "tiny houses" that comply with these restrictions in every way except the minimum floor area. "Tiny Houses" shall be those houses that are less than (800) square feet in ground area, which are of the same structural integrity of a site-built, larger home, are generally allowed and may be approved on a case-by-case basis by the ACC. This excludes single-wide mobile/modular/factory homes. All exterior colors, textures, and materials must be compatible not only with this specified design motif but also with adjacent and surrounding Lots, and over-all community appearance. A nice barn or workshop with living quarters within is acceptable, provided it is built from quality materials and has a pleasing architectural style. All structures must have the exterior construction completed in its entirety within one hundred eighty (180) days from ground breaking or initial placement upon the Lot.

4.03. Setbacks. No building shall be located on any Lot nearer to the front Lot line or nearer to the side lot line than the minimum building setback lines of:

Exceptions to the minimum setbacks, as described above, may be granted by the ACC on a case-by-case basis.

For purposes of this covenant, eaves, steps, and open porches shall not be considered as a part of the building; provided, however, that this shall not be construed to permit any portion of the building on any Lot to encroach upon another Lot.

4.04. Resubdivision or Consolidation. No Lot shall be resubdivided or split except as follows. Any Owner of one or more adjoining Lot may consolidate such Lot into one single-family residence building site. A Lot Owner may subdivide a Lot; however, each subdivided Lot shall have not less than two and one-half (2.5) acres once subdivided. The Owner is responsible for obtaining a permit, approval, and inspection of the OSSF from the appropriate County & City's Health District. The ACC must approve fences as provided in Article 2. No construction of the fence may begin until the specifications and a site plan showing the location of the fence have been submitted to and approved, in writing, by the ACC. Any fence installed, regardless of height or length, without the prior approval of the ACC and deemed in violation of these restrictions is subject to being removed, without notice, at expense of the owner.

4.10. Surface Mining and Natural Resources. It is expressly forbidden by these restrictions to mine surface or subsurface minerals or soils by strip-mining or by any other method, for resale from any Lot within the Property. This restriction is inclusive of caliche or other similarly known soil materials. This restriction does not prohibit the pumping of ground water for consumption upon the Lot wherein the well is located. (e) Any and all animals, including household pets, require appropriate fencing to confine them to their Lot. No animal shall be permitted until the appropriate fencing is completed. It is each Owner's responsibility to install a gate and/or cattle guard to prevent cattle or other livestock from getting onto the Main Roads. Mobile homes shall be underpinned and skirted within 60 days from date placed on the property with a professional quality appearance. If a home is not skirted and underpinned within 60 days of placement, the home shall be subject to removal at owner's cost and the Purchaser may be assessed \$100 per month beginning 10 days after certified notice has been sent by Developer.

4.15. Water. In compliance with Maxwell Water Supply agreement, private water wells are prohibited and owner must use water conservation oriented fixtures and devices, such as low-flow toilets, and select grasses and landscaping vegetation which is drought tolerant.
