This Survey complies with both the rules of the Georgia Board of Registration for Professional Engineers and Land Surveyors and the Official Code of Georgia Annotated (OCGA) 15-6-67 as amended by HB1004 (2016), in that where a conflict exists between those two sets of specifications, the requirements of law prevail. It is hereby certified that this plat is true and correct as to the property lines and all improvements shown thereon, and was prepared from an actual survey of the property made by me or under my supervision; that all monuments shown hereon actually exist, and their location, size, type and material are correctly shown. The linear and angular measurements shown on this plat were obtained by using Carlson BRX7 base and rover GPS receivers, in combination with a Geomax CRx5 robotic total station. The relative positional accuracy obtained on the points utilized in this survey were less than or equal to 0.02' horizontal at the 95% confidence level. Distances shown hereon are ground distances obtained from grid measurements using a combined scale factor. This plat was calculated for closure and is found to have a minimum plat closure of one foot in 122,490 feet. The field survey was completed on 8/23/2024.
