Future Land Use Map

Water Infrastructure Map

This map was created using information provided by the Pleasant Hill Comprehensive Plan. All prospective buyers and their agents should verify its accuracy and do their own due diligence in regards to the subject property.

Tract 1, locally known as the Home Farm, consists of 133.71 acres m/l and is located in Pleasant Hill, Iowa, just south of Southeast Polk High School and NE University Avenue/Highway 163. The property includes predominantly Low-Density Residential zoning, with Rural Residential-zoned parcels off of SE 80th Street. Per the Pleasant Hill comprehensive plan, the land is located within a Priority Growth Zone, indicating that the land would be ideal for development and would easily be supported by the city's pre-existing infrastructure.

The City of Pleasant Hill maintains the current sanitary sewer infrastructure, which is located along the south and east boundaries of the property, with an existing lift station also located near the southeast corner of the property. Des Moines Water Works provides total service to the City of Pleasant Hill regional water utility and has 4" mains along the south and east boundary of the property. There is also a 24" ductile iron main on both the south and east boundaries of the property. While taps onto this main are not allowed, the size of the main suggests ample capacity to service this property at the slated zoning density.

The progressive city of Pleasant Hill published a market analysis that anticipates the community to double in size by 2050, resulting in the need for approximately 4,150 new residential units. The city is continuously looking to improve local amenities and infrastructure that support its long-term vision and growth projections. Recent projects include commerce parks, school improvements, business expansions, residential developments, infrastructure upgrades, a parkway connector to Downtown Des Moines, trail enhancements, and environmental improvements.

TRACT NO 1, THE HOME FARM

The property is currently utilized as a row crop farm, with an estimated 99.2 acres in production, carrying a CSR2 value of 79.4. The farm includes predominantly Tama and Clarion soil types, known for being two of the most productive soil types in Iowa. The property includes established terraces, waterways, and is known to have drainage tile (tile maps are not available), enhancing its agricultural viability. Multiple grain marketing options are conveniently located near the farm, including Landus and Heartland Cooperatives, as well as the ADM processing plant, ensuring strong market access for agricultural producers.

This is a prime opportunity to own a high-quality land asset that is located in the short-term path of development.

Sanitary & Sewer Map

TRACT NO 2, THE CURRY FARM

Listing #18254

151.43 Acres M/L ♦ Asking Price: \$1,665,730

SE 32nd Street & SE 100th Avenue, Runnells, IA

Tract 2, locally known as the Curry Farm, consists of 151.43 acres m/l, featuring 104.50 FSA cropland acres with a CSR2 rating of 66.2. The land features Downs and Colo-Judson soil types, known for their productivity throughout Central Iowa. The property includes established terraces, waterways, and is known to have drainage tile (tile maps are not available), enhancing its long-term agricultural viability.

The property also offers excellent building sites with rolling topography, making it well-suited for residential development. Additionally, the land provides recreational opportunities, with a healthy population of whitetail deer and turkey frequently seen on the property. This rare combination of productive farmland, scenic landscapes, and wildlife habitat creates an appealing setting for those seeking both investment potential and outdoor enjoyment—all within close proximity to the DSM area.

Currently zoned as Rural Residential, this property allows for continued row crop production while offering future development potential in accordance with Polk County and Runnells Planning and Zoning ordinances. Utility services are provided by Des Moines Water Works and MidAmerican Energy, making development feasible.

This is a prime opportunity to own income-generating farmland with future appreciation potential through various avenues of development. Whether you're an investor, farmer, or developer, this property provides versatility and long-term value.
