

your frustration. We will review our internal processes to see how we could potentially provide better notice in the future.

Below, I have added a screenshot of the tract you referenced (3381). However, please be aware that we are still very early in the process and all of the routes are *preliminary* and could be changed or modified before the application filing in December. We will not have the final routes until we file application in December. Once we file the application, if your property is impacted by one of the *proposed* route links, you will receive another packet in the mail. That packet will have information on how you can be a *protestor* or *intervenor* in the proceeding.

Please let me know if you have additional questions or concerns. I would be happy to meet with you tomorrow morning via a phone call to walk you through the process. On the below photo, one of the many *preliminary links* is labeled in green and I have highlighted tract 3381 in yellow.
