Cavco Manufacturing, LLC : Cavco Clarion
20898 Paint Blvd /
Shippenville, PA 16254

Date of Manufacture
04/24/2025

HUD label No.(s)
RAD 1571238
RAD 1571239

Manufacturer's Model Unit Designation and Serial Numbers
560BZ-Blazer Select-28403A-1023
CAV560PA25-15148A
CAV560PA25-15148B

Twining Consulting, Inc. dba RADCO

This manufactured home is designed to comply with the federal manufactured home construction and safety standards in force at time of manufacture. (For additional information, consult owner's manual.)

The factory installed equipment includes:

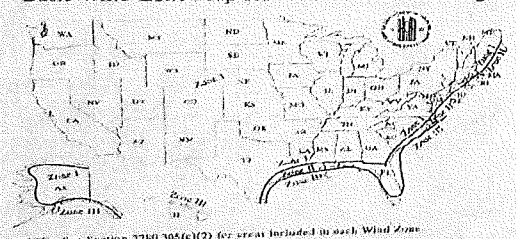
Equipment	Manufacturer	Model Designation
For Heating	Nordyne	MG1E-B056F1ABM1
For Cooking	Whirlpool	WFES3030RB0
Refrigerator	Whirlpool	WRT318FZDB11
Water Heater	Rheem	E30 1 RH95
Washer	N/A	N/A
Clothes Dryer	N/A	N/A
Dishwasher	N/A	N/A
Fireplace	N/A	N/A
Microwave	N/A	N/A
Air Conditioner	N/A	N/A
Garbage Disposal	N/A	N/A

HOME CONSTRUCTED FOR _X_ ZONE I ___ ZONE II ___ ZONE III ___ EXP. "D"

This home has not been designed for the higher wind pressure and anchoring provisions required for ocean/coastal areas and should not be located within 1500' of the coastline in Wind Zones II and III, unless the home and its anchoring and foundation system have been designed for the increased requirements specified for Exposure D in ANSI/ASCE 7 - 88.

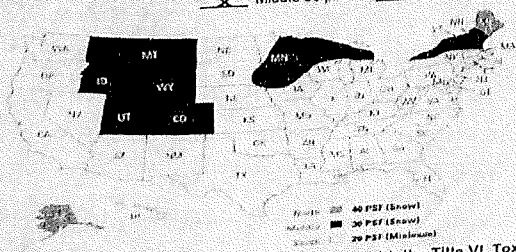
This home has ( ) has not(X) been equipped with storm shutters or other protective coverings for windows and exterior door openings. For homes designed to be located in Wind Zones II and III, which have not been provided with shutters or equivalent covering devices, it is strongly recommended that the home be made ready to be equipped with these devices in accordance with the method recommended in manufacturers printed instructions.

Basic Wind Zone Map for Manufactured Housing



NOTE: See Section 3280.305(c)(2) for areas included in each Wind Zone

Design roof load zone map: ___ North 40 psf ___ South 20 psf
_X_ Middle 30 psf ___ Other ___psf



COMFORT HEATING

This manufactured home has been thermally designed to conform with the requirements for the [illegible] manufactured home construction and safety standards for [illegible] Zone 3 . (See map at bottom)

Heating equipment manufacturer and model (see list at left).
The listed heating equipment has the capacity to maintain an average 70 degrees Fahrenheit temperature in this home at outdoor temperatures ___ 0 ___ degrees Fahrenheit.
To maximize furnace operating economy, and to conserve energy, it is recommended that this home be installed where the outdoor winter design temperature (97 1/2%) is no lower than ___ 20 ___ degrees Fahrenheit.
The above information has been calculated assuming a maximum wind velocity of 15 mph at standard atmospheric pressure.

COMFORT COOLING

[ ] Air conditioner provided at factory (Alternate I)

Air conditioner manufacturer and model (see list at left).
Certified capacity _____ B.T.U./hour in accordance with the appropriate air conditioning and refrigeration institute standards.
The central air conditioning system provided in this home has been sized assuming installation on the front (hitch end) of the home facing. _____ On this basis the system is designed to Maintain an indoor temperature of 75°F when outdoor temperatures are _____ °F dry bulb and _____ °F wet bulb.
The temperature to which this home can be cooled will change depending upon the amount of exposure of the windows of this home to the sun's radiant heat. Therefore, the temperature which can will vary dependent upon its orientation to the sun and any permanent shading provided. Information concerning the calculation of cooling loads at various locations, with and without and shadings are provided in Chapter 22 of the 1989 edition of the ASHRAE Handbook of Fundamentals. Information necessary to calculate cooling loads at various locations and orientations is provided in the special comfort cooling information provided with this home.

[X] Air conditioner not provided at factory (Alternate II)

The air distribution system of this home is suitable for the installation of central air conditioning. The supply air distribution system installed in this home is sized for a manufactured home central air conditioning system of up to 45063 B.T.U. /hr. rated capacity which are certified in accordance with the appropriate air conditioning and refrigeration institute standards, when the air circulation of such air conditioners are rated at 0.3 inch water column static pressure or greater for the cooling air delivered to the manufactured home supply air duct system.
Information necessary to calculate cooling loads at various locations and orientations is provided in the special comfort cooling information provided with this manufactured home.

To determine the required capacity of equipment to cool a home efficiently and economically, a cooling load (heat gain) calculation is required. The cooling load is dependent on the orientation, location and the structure of the home. Central air conditioners operate most efficiently and provide the greatest comfort when their capacity closely approximates the calculated cooling load. Each home's air conditioner should be sized in accordance with Chapter 22 of the American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Handbook of Fundamentals 1989 edition, once the location and orientation are known.

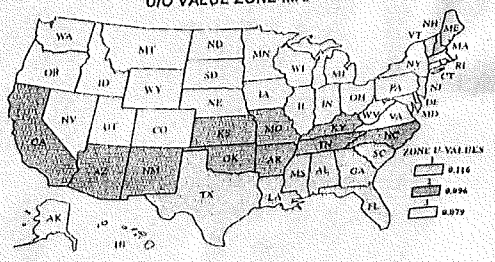
INFORMATION PROVIDED BY THE MANUFACTURER NECESSARY TO CALCULATE SENSIBLE HEAT GAIN

Walls (without windows and doors)	U= .061
Ceiling and roofs of light color	U= N/A
Ceilings and roofs of dark color	U= .041
Floors	U= .049
Air ducts in floor	U= 0.178
Air ducts in ceiling	U= N/A
Air ducts installed outside the home	U= N/A

The following are the duct areas in this home:

Air ducts in floor	333 sq. ft.
Air ducts in ceiling	N/A sq. ft.
Air ducts outside the home	N/A sq. ft.

U/O VALUE ZONE MAP



The manufacturer certifies this home is compliant with the Title VI, Toxic Substances Control Act.
This manufactured home IS NOT designed to accommodate the additional loads imposed by the attachment of an attached accessory building or structure in accordance with the manufacturer installation instructions.

Form Revision Date: 3/04/2025
