TIME OF TRANSFER INSPECTION TOT# 18290 DONALD VILLHAUER, JR. CERT # 10440

Site Information

Parcel Description: **NE 1/4, SE 1/4, SEC 27, T 79, R 4, Springdale**

Address: **2263 Eureka Ave, West Liberty, IA 52776** County: **Cedar**

Owner Information

Property is owned by a business: **No**

Business Name:

Owner Name: **Kurt Parizek**

Email Address: **kurtparizek@gmail.com**

Address: **2263 Eureka Ave, West Liberty, IA 52776**

Phone No:

Site related information

No Of Bedrooms: **3**

Facility Type: **Residential**

Last Occupied:

Permit issued by County: **Yes**

All plumbing fixtures enter septic system: **Yes**

Property Information Comments:

Inspection Date: **10/24/2025**

Currently Occupied: **Yes**

System Installation Date: **06/05/1980**

Permit Number: **15-80**

County contacted for records: **Yes**

Primary Treatment

Tank 1

Tank Name: **Tank 1**

Tank Material: **Concrete**

No. of Compartments: **2**

Date Pumped: **10/24/2025**

Distance To Well (Ft.): **100+**

Risers Intact: **No**

Tank/Vault Pumped: **Yes**

Tank Comments:

Type: **Septic Tank**

Tank Corrosion Type: **Slight**

Pump Tank Chamber: **No**

Meets Setback to Well: **Yes**

Is Accessible: **Yes**

Effluent Filter Present: **No**

Inlet Baffle Present: **Yes**

Tank Size (Gal): **1250**

Liquid Level Type: **Normal**

Licensed Pumper Name: **Triple B Construction**

Well Type: **Private**

Lid Intact: **Yes**

Watertight: **Yes**

Outlet Baffle Present: **Yes**

Functioning as Designed: **Yes**

General Primary Treatment Comments:

Distribution Type

Distribution Box 1

Label: **Distribution Box 1**
Box Opened: **Yes**
Watertight: **Yes**
Material Type: **Concrete**
Baffle Present: **No**
Functioning As Designed: **Yes**
Accessible: **Yes**
Speed Levelers Present: **No**

General Distribution System Comments :

Secondary Treatment

Lateral Field1

Distribution Type: **Distribution Box**
Lines: **3**
Gallons Loaded: **250**
Distance To Well (Ft.): **100+**
Grass Cover Present: **Yes**
Easement Present: **N/A**
Comments:
Material Type: **Rock and PVC Pipe**
Total Length of Absorption Line: **90**
Meets Setback to Well: **Yes**
Lateral Lines Probed: **Yes**
Lateral Lines Equal Length: **Yes**
Functioning as Designed: **Yes**
Trench Width: **24**
System Hydraulic Loaded: **Yes**
Well Type: **Private**
Saturation or Ponding Present: **No**
System Located on Owner Property: **Yes**

General Secondary Treatment Comments:

Narrative Report

TOT Inspection Report Overall Narrative Comments: **Time of Transfer inspection conducted on October 24, 2025. Interior plumbing inspected, all sewage and gray water enters septic tank. Located and inspected septic tank. Septic tank was found to be a 1,250 gallon two compartment concrete tank with concrete baffles. Tank had cast iron inlet and outlet lines. No cleanout noted between house and tank. Tank was located in a bean field, North of the residence. Corrosion noted to outlet baffle. Tank did not have risers to the surface and did not have an effluent filter. Effluent exits tank in cast iron for approximately 5 feet then turns into 4 inch Sch40 for 3ft then back to cast as it enters the concrete distribution box. The distribution box uses 3 outlets to disburse effluent to 3 - 90 foot laterals of 6 inch perforated PVC pipe covered with rock. Each lateral was 2 feet wide.. A hydraulic load test of 250 gallons +/- of water conducted, the system showed no signs of seepage or backup. At the time of inspection, the system appears to be working as designed.**

This permit does not insure any form of guaranty. It only states that the sewer system complies with the Cedar County Rules and Regulations pertaining to residential sewer systems.

I certify that, to the best of my knowledge, the above information is correct, that all proposed work as indicated will be completed in accordance with the Cedar County Regulations before the facilities are placed in operation, and that adequate maintenance procedures will be followed. I will also comply with regulations that require that the Health Department be notified at least seven and one-half working hours in advance, between 8:00 a.m. and 4:00 p.m., that the site is ready for final inspection prior to covering.

It is understood that the local board of health may require a connection to a public sewer when one becomes available in the future.
