PPN 10-21090.000

Note: An attempt was made to hold the creek from the survey by Howard Hupp in 82 in some areas. However, the creek has shown movement through erosion and accretion and since the call was made for the centerline of the creek I held the current centerline of the creek from the date of this survey. Also, the survey by said Hupp seemed to have some form of a 40'± error despite closing with tolerance. This is also why record information from the parcel to the north and physical occupation was used to establish the north line over said survey by Hupp.

I certify this survey to be correct to the best of
my knowledge.
